**A. Personal Statement**

As a career oncology nurse I have spent the last 19 years working with cancer patients in nearly every arena in oncology. I have always loved the every changing world of oncology and in particular enjoyed the constant process of learning that takes place with every new clinical trial. I have taken what I have learned in the inpatient, infusion and bone marrow transplant setting and used that knowledge to care for patients in complex oncology clinical trials as a research nurse coordinator for the past 12 years. During my time in research I have worked with all of the NCI cooperative groups as well as PI initiated and pharmaceutical sponsored trials. I have served as Program Manager for the Ochsner CCOP and Interim Program Manager for the LSU New Orleans MB-CCOP.

My years of experience have included community hospital settings, academic institutions and private practices to give me a broad understanding how each functions. Over the years I have worked in every facet of the research process including management that has taught me about the many complex issues surrounding research including staffing, billing and coordination with other entities. My years of experience make me an excellent candidate to work on the NCORP program.
