Teaching Residents to Teach, July, 2001

LSU Health Sciences Center at Shreveport, Surgery Grand Rounds: Enteral Nutrition, March, 1995

LSU Health Sciences Center at Shreveport, Vascular Surgery Grand Rounds:
Aortoduodenal Fistula, November, 1994

Special Clinical Rounds-

- Surgical Intensive Care Unit (SICU) Rounds. Conduct rounds in the ICU interacting with residents, fellows, students, nurses and all support staff. Four to six days/month.

- Nutrition Rounds Implemented and conduct rounds in the SICU with a multidisciplinary team including physicians, residents, fellows, dieticians, pharmacists, and nurses focusing nutritional care. Weekly.

Graduate Students Trained:

- Past** – Mentored Jennifer Fischer, a Master's candidate in nutrition and dietetics in her research on malnutrition in the obese patient.
- Mentored Paul Perkowski in his research project looking at trauma admission patterns before and after the institution of a Level 1 Trauma Center.
 - Mentored Kierstin Lund during a ½ year clinical research effort studying vacuum assisted wound closure in the management of the open abdomen.
 - Mentored Sid Brevard, Trauma Fellow, in study of disaster management following Katrina.

Grants & Contracts (note role on grant; i.e. PI, coPI, Consultant, etc):

Funded -Closed

Bayer Corporation

Protocol No. 100272

A Prospective, randomized, double-blind, multi-center trial assessing the safety and efficacy of sequential (intravenous/oral) Bay 12-8039 (Moxifloxacin) 400 mg every 24 Hours compared to intravenous Piperacillin/Tazobactam 3.375 grams every 6 hours Followed by oral Amoxicillin/Clavulanic Acid Suspension 800 mg every 12 hours For the treatment of patients with complicated intra-abdominal infections.

Co-Investigator

\$64,588.

Merck Corporation

Protocol # 034-00/ERT502

A prospective, multi-center, double-blind with in-house blinding, randomized comparative study to evaluate the efficacy, safety and tolerability of Ertapenem versus Piperacillin/Tazobactam in the treatment of diabetic foot infections in adults

Co-investigator

\$44,265

Merck Corporation

Protocol #037-00

A prospective, multi-center, double-blind randomized comparative study to evaluate the safety, tolerability and efficacy of Ertapenem versus Piperacillin/Tazobactam in the treatment of complicated intra-abdominal infections in hospitalized adults.

Co-investigator

\$53,024

Lilly Corporation

Efficacy and safety of Drotrecogin Alfa (activated) in adult patients with early stage severe sepsis.

Co- investigator

\$94,741

Wyeth Corporation

Protocol #3074A1-311-WW

A phase 3, multicenter, randomized double-blind comparative study of the efficacy and safety of Tigecycline vs. Imipenem/cilastatin for the treatment of subjects with nosocomial pneumonia

Co- Investigator

\$70,208

Sanofi-Synthelab

A multicenter, randomized, double-blind parallel group trial to demonstrate the efficacy of fondaparinux in association with intermittent pneumatic compression versus intermittent pneumatic compression used alone for the prevention of venous

thromboembolic events in patients at increased risk undergoing major abdominal surgery

Co-investigator

\$90,000

Funded – Open

Pending funding

Cubicin® for post-surgical wound infections

Co-Investigator

Ortho-Biotech Corporation

Protocol # PR04-15-001

A randomized, double blind, placebo controlled study to assess the effects of recombinant human erythropoietin (rHuEPO, Procrit) on functional outcomes in anemic, critically ill, blunt trauma patients after hospital discharge.

Primary Investigator
