

## Health Benefits of Quitting Smoking

Improving your health is the main reason to quit smoking and to stay quit. You get healthier in many ways soon after stopping. For instance:

20 minutes after quitting: Your heart rate and blood pressure may drop.<sup>1</sup>

At 48 hours: Your senses of smell and taste may get better.<sup>1</sup>

**Within a few weeks of quitting:** You may not cough or wheeze as much. You may not produce as much phlegm. Your circulation may get better. Wound healing may be faster.<sup>2</sup>

**Within a few months:** Your lung function may improve greatly. You may have a lower chance of getting lung illnesses such as pneumonia.<sup>2</sup>

**1 to 9 months after quitting:** Your shortness of breath and sinus congestion may get better. Your fatigue may improve, too.<sup>1</sup>

## There are just as many health benefits years after quitting<sup>1</sup>
