About this recipe book

Who is this book for?

When you're affected by cancer, you may not feel like eating. But it's important that you do. The recipes in this book have been designed for people with cancer who have eating problems. Many of the recipes include ingredients that are high in fat or sugar to help you get enough energy and maintain your weight during cancer treatment. They are designed to be appetising and to encourage you to eat even when you don't feel like it.

Most of the recipes are simple and quick to prepare. This is to make it as easy as possible to cook when you're not feeling well. Hopefully they will help you rediscover some enjoyment in eating tasty, nutritious food.

If you are eating well and want to follow a healthy diet, there are some healthier-eating recipes in this book. Our booklet *Healthy eating and cancer* may also be helpful for you.

Where are the recipes from?

This book has been planned and written with food experts, including dietitians. The original version was put together with help from celebrity chef Brian Turner, and some of his creations are in this edition. Other recipes have kindly been contributed by a number of people and organisations, including BBC Good Food, Canned Food UK, CaribbeanPot.com, NHS Choices, the Oesophageal Patients Association, the Royal Marsden Hospital and Waitrose. Some of these recipes have been adapted to make them more suitable for people affected by cancer.

Further information

If you'd like to talk about any of the information in this book, you can call our cancer support specialists on **0808 808 00 00**. They can give you information about eating problems and answer any questions you have.

See pages 90–92 for a list of other useful organisations and resources.

Dietary needs when you have cancer

Eating for health is important for us all. The usual advice is to eat at least five portions of fruit and vegetables a day, increase our fibre intake, and eat only small amounts of foods that are high in fat. If you want to follow a healthy diet, you can find out more in our booklet *Healthy eating and cancer*.

When you have cancer, there are times when your dietary needs may change. The cancer may have caused you to lose weight. Or you may have a specific problem that makes eating difficult. It is important to try to maintain your weight. This helps you stay strong to deal with the side effects of cancer and its treatment.

Protein and calories

People who are finding it difficult to eat enough may need to get extra protein and calories from foods that are high in fat, such as milk, cheese and eggs. Your doctor or dietitian may recommend you eat foods that you would normally think of as unhealthy.

For recipes that are high in calories and protein, look out for the  symbol. We also have a list of tips for adding extra protein and energy to your food on page 9. If you're struggling to eat enough to maintain your weight, our booklet *The building-up diet* is also useful.

Other health conditions

If you are already on a special diet for diabetes, kidney or heart disease, or other health problems, it is important to talk to your doctor or dietitian for advice. See page 7 for more information.

Ready meals

If you find you are too tired to prepare and cook food, having ready meals can be the easiest way to get enough calories. There are many options available, from ready-made pasta and curry sauces to microwavable meals. It's a good idea to stock your cupboards with some of these before treatment starts. Adding side portions of vegetables will bulk up the meal and increase your intake of vitamins and minerals. Green, leafy vegetables such as broccoli or spinach are good choices.

Choosing a recipe

Eating problems

Some people with cancer develop problems that affect their ability to eat. These problems may be a result of the cancer or its treatment.

If you have a **dry or sore mouth**, you may need to avoid dry foods and add sauces or gravies. Creamy foods may be easier to eat. Look for recipes with this symbol . If your mouth is sore, you should also avoid foods that are spicy, acidic or salty. These include chilli peppers, citrus fruits and tomatoes. We can send you more information about mouthcare during treatment.

If you have **problems chewing or swallowing**, softer foods may be easier to eat. Cut all the ingredients into small slices or chunks. Adding sauces or gravies may also help the food go down. You may need to use a liquidiser or blender for some dishes. In this book, look for recipes with this symbol .

If you have **lost your sense of taste or smell**, you may want to eat foods that have stronger flavours or spices. You can add extra spices to the recipes in this book, or try the recipes with this symbol .

If you are **feeling sick**, it may help to eat bland or dry foods. Many people find they need to avoid creamy or spicy foods. But foods that make one person feel sick might be fine for someone else. This means that some of the recipes we've labelled as suitable for people with sickness may not be suitable for you. These recipes have this symbol .

Some people may have a bigger appetite due to medicines they are taking. In this case, it's important to eat lower-calorie foods so you don't put on too much weight. Look for recipes with the **healthier-eating** symbol . Or adapt the recipes to reduce the fat content, for example by using skimmed milk instead of cream. Our booklet *Healthy eating and cancer* has more information on following a healthy diet.

Recipes that are particularly suitable for one or more of these problems are marked with the symbols above. You can see the full key on the inside front cover of this book. There's also an index of recipes ordered by eating problem on pages 84–87. This will help you find a recipe that's most suitable for your needs.

The recommendations in this book are a guideline only. Talk to your doctor and/or dietitian about the foods that are suitable for your needs. And experiment to find out what works well for your tastes.

Our booklet *Eating problems and cancer* has more useful tips on how to cope with the problems listed on the opposite page. It also has advice on which foods to eat and which to avoid if you have constipation or diarrhoea.

Other health conditions

Some people with cancer may have dietary needs or eating problems that are not covered in this book. For example:

- people with diabetes, kidney disease or heart disease
- people who have a colostomy or ileostomy
- people who have had all or part of their stomach or bowel removed
- people who have had radiotherapy to their mouth or jaw.

These people may need to follow a special diet designed for them. You can ask your doctor, specialist nurse or dietitian for advice about these diets.

Low immunity

If your immunity is very low, you should ask your doctor about whether there are any foods you need to avoid. They may recommend that you avoid:

- cheeses made from unpasteurised milk, such as brie and blue-veined cheeses
- liver pâté
- live bacterial yoghurt
- raw or undercooked eggs
- uncooked herbs, spices, pepper and peppercorns.

It's also important to be careful with food hygiene when you're cooking (see page 11).

Saving money

Worries about money are very common for people affected by cancer. If you're on a limited budget, you may want to choose recipes with lower-priced ingredients. You can also substitute ingredients that seem too expensive for ones that cost less.

We can send you our booklet *Help with the cost of cancer*, which has information about getting financial support. You can also view this information online at macmillan.org.uk/financialissues

Adapting the recipes

Adding extra energy and protein

If you're losing weight or have a poor appetite, it is important to choose high-energy foods to get enough calories. Look out for the  symbol.

Below are some tips to add energy and protein to meals:

- When you're shopping, choose full-fat foods instead of 'diet' or 'light' foods.
- Fry your foods in oil or ghee.
- Add extra butter, margarine or oil to bread, potatoes, pasta and cooked vegetables.
- Add extra cheese to sauces and extra paneer to curries.
- Add cream, sour cream, plain yoghurt, mascarpone or creme fraiche to sauces, soups and meat dishes.
- Add whole or blended beans, lentils or peas to curries and stews.
- Add evaporated milk, condensed milk or cream to desserts and hot drinks.
- Have cream or ice-cream with desserts.
- Add peanut butter (and other nut spreads), chocolate spread, tahini, honey or jam to bread, toast, crackers and biscuits.

Our booklet *The building-up diet* has more information on maintaining your weight when you have a poor appetite or eating difficulties.

If you are still struggling to maintain your weight, your doctor, nurse or dietitian may suggest you take supplements. These will increase the protein or energy content of your diet. They are usually available on prescription. You can take them as drinks or snacks between meals or add them to food.

Substituting ingredients

None of the recipes need to be followed exactly, so feel free to use different ingredients from the ones listed. Just remember that this will change the nutritional values from those given.

If you don't eat dairy products, you can:

- replace milk with soya, oat, rice, hazelnut, almond or coconut milk
- replace cream with coconut cream
- replace butter with vegetable or coconut oil
- replace yoghurt with soya or coconut yoghurt.

Some of the recipes include spices (look for the  symbol). These can help if you've lost some sense of taste and smell and want something with strong flavours. But if highly flavoured foods don't appeal to you, make these dishes milder by swapping ingredients or adding natural yoghurt.

Cooking the recipes

Food hygiene

If your immune system is weak, you are more at risk of getting food poisoning. You may also be less able to cope with the symptoms of food poisoning.

To reduce this risk you should:

- use ingredients that are as fresh as possible
- wash your hands before you touch food
- keep pets out of the kitchen
- wash all fruit and vegetables well in cold running water – do not soak them unless you're using dried lentils or beans
- clean cooking utensils and chopping boards thoroughly
- wipe worktops with hot, soapy water or an antibacterial spray, particularly after you've used them to prepare raw meat or eggs
- wash or replace dishcloths and tea towels regularly.

Leftovers

If you decide to store food to eat later, let it cool down completely then store it in the fridge or freezer. Freezing extra portions can save you time later and is a useful thing to do before your treatment starts. Remember to defrost your foods fully before reheating them. This is especially important if you have low immunity due to treatment. Only reheat food once and make sure it's piping hot right through before you eat it. Take care not to burn your mouth or tongue if you're reheating food.

STARTERS AND SNACKS

Great to snack on or something light

If you struggle with sickness, a lighter snack may appeal. If you have problems chewing, soups are great if you thoroughly blend and mix the ingredients. If you're underweight or need to increase your energy and protein intake, choose recipes with a higher fat content (see the nutritional information next to each recipe). You can also try some of the tips on page 9 to add extra energy.

gas mark 6.
- 2 Heat the oil in a frying pan and add the garlic
and chorizo. Fry gently, making sure the garlic
doesn't brown.
- 3 Add the wine and tomatoes and continue
cooking for 1–2 minutes.
- 4 Add the butter beans, the cannellini beans
and half the parsley. Continue cooking for
5 minutes on a medium/low heat. Add the
salt and pepper and take off the heat.
- 5 Rub each side of each slice of bread with the

Bake in the oven for 5–10 minutes.
- 7 Spoon the warm chorizo mixture over the

Breakfast on the grill

Preparation 10 minutes

Serves 4

2 large potatoes, peeled and sliced 60mm/0.25 inch thick

Olive oil (2 tbsp)

1 medium onion, thinly sliced

Feta cheese
(85g/3oz), crumbled

Fresh chives (1 tbsp), chopped

1/4 scotch bonnet pepper,
deseeded and chopped

Dried thyme (1 tsp)

4 strips of crispy bacon,
cut or crumbled into small pieces

4 eggs

1 medium tomato, thinly sliced

Fresh parsley (1 tbsp), chopped

Salt and black pepper

Handful of cheese (such as
cheddar or red leicester), grated

Cooking 45 minutes

- 1 Boil the sliced potatoes for about 15 minutes until tender.
- 2 Brush the olive oil over the bottom of a pan. Spread the sliced onion across the bottom of the pan, then layer the sliced potato on top.
- 3 Spread the feta cheese evenly on top of the potato. Then top with the chives, scotch bonnet pepper, thyme and bacon bits.
- 4 Crack in the eggs so they're spaced apart evenly. Put the tomato slices between them. Top with the parsley, black pepper and salt.
- 5 Grill for 20–25 minutes at a moderate heat.
- 6 Top with the cheese and melt under the grill for 5 minutes.
- 7 Cut into four slices and serve.

Try using different types of cheese, or using sweet potato or yam instead of potato. To save time and effort, you can buy ready-grated cheese in many supermarkets.

If you have a sore mouth or don't like spicy food, leave out the scotch bonnet.

Sweet potato crab cakes

Preparation 10 minutes

Serves 4

Sweet potato (450g/1lb),
peeled and cut into chunks

1 spring onion, chopped

Half a small red onion,
finely chopped

Salt and black pepper

Dried thyme (0.25 tsp)

Fresh parsley (1 tbsp), chopped

Mayonnaise (1 tbsp)

Breadcrumbs (120g/4oz),

Vegetable oil (1 tbsp)

Cooking 35 minutes (plus 30 minutes chilling)

- 1 Boil the sweet potato until tender. Drain it and mash it in a deep bowl.
- 2 When the sweet potato is cool, add all the ingredients except the crabmeat, breadcrumbs and vegetable oil. Mix well.
- 3 Squeeze the water from the crabmeat and fold into the mixture. Chill in the fridge for about 20 minutes.
- 4 Roll the mixture into balls the size of a golf ball. Then roll the balls in the breadcrumbs, pressing down gently so the crumbs stick. Put them in the fridge for 10 minutes to firm up.
- 5 Heat the vegetable oil on medium in a wide pan. Press down on each crab cake ball to make a patty. Fry them on each side until golden brown, then drain them on paper towels to absorb the extra oil.

Using wholemeal breadcrumbs will increase the fibre content.

Scotch bonnets are hot! If you have a sore mouth, leave it out. If you like less heat, use a bird's eye chilli instead.

Smoked fish chowder

Preparation 15 minutes

Smoked haddock fillet
(450g/1lb)

Butter (55g/2oz)

finely chopped

Flour (2 level tbsp)

Potatoes (225g/8oz),
peeled and finely chopped

Carrots (170g/6oz),

Single cream (140ml/0.25 pint)

Salt and black pepper

- 1 Boil 1 litre of water, then reduce the heat to simmer. Add the haddock for about 10 minutes until tender.
- 2 Drain the haddock, keeping the water to use later as a stock. Flake the haddock roughly, discarding the skin and bones.
- 3 Heat the butter in a pan. Add the onion and fry until soft. Stir in the flour and cook for 1 minute.
- 4 Gradually add the stock and bring to the boil, stirring constantly. Add the potatoes and carrots and simmer for about 10 minutes until tender.
- 5 Stir in the flaked fish and cream. Season well and serve.

If you have problems chewing or swallowing, liquidise the soup in a blender or food processor (and sieve if necessary). Then reheat it, without boiling, before serving. To make it more varied and easier to prepare, use a fish pie mix instead of the haddock.

Summer pudding

Cooking 15 minutes plus chilling overnight

Serves 4

Mixed fruits – raspberries, blackberries, redcurrants and blackcurrants (900g/2lbs in total)

Caster sugar (115g/4oz)

Juice of 1 lemon

1 cinnamon stick

Bread (450g/1lb), one day out of date, sliced and crusts removed

Clotted cream (150ml/0.25 pint)

- 1 Wash the fruit and put it in a pan.
- 2 Add the sugar, lemon juice and cinnamon. Bring to the boil and simmer gently for 5 minutes.
- 3 Use a colander and a bowl to separate the fruit from the juice. Put the fruit to one side.
- 4 Return the juice to the heat and simmer until it's reduced by half. Leave to cool.
- 5 Dip the slices of bread in the juice, then use them to line the base and sides of a pudding basin or pie dish. Overlap the slices a little so there are no gaps.
- 6 Cover the base with a layer of fruit, then a layer of dipped bread. Repeat until the dish is full, ending with a layer of bread.
- 7 Put a piece of greaseproof paper on top, and weigh it down lightly.
- 8 Refrigerate overnight. Turn the pudding out upside-down on to a plate and serve with clotted cream and some of the juice.

If you have sickness, leave out the clotted cream. If the fruit is out of season, buy frozen fruit.

Greek honey cheesecake with apricot compote

Preparation 10 minutes

Serves 4–6

8 digestive biscuits

Butter (56g/2oz)

Runny honey (2 tbsp)

Curd cheese or ricotta (225g/8oz)

Caster sugar (55g/2oz)

2 eggs, separated

Dried, no-soak apricots (115g/4oz), chopped

Set honey (2 tbsp)

To separate the eggs, crack each one over a bowl, letting the white fall into the bowl. Keep the yolk in one half of the shell. Move the yolk from one half of the shell to the other, tipping any white into the bowl. When there's no white left, drop the yolk into a different bowl.

Cooking 40 minutes

- 1 Preheat the oven to 180°C/160°C fan/gas mark 4.
- 2 Put the digestive biscuits in a clean plastic bag and crush into fine crumbs using a rolling pin.
- 3 Melt half the butter in a pan, then mix in the biscuit crumbs.
- 4 Use the mixture to cover the bottoms of individual ramekin dishes or one round, ovenproof dish (about 20cm/8 inches wide and 5cm/2 inches deep).
- 5 Warm the runny honey in a small pan or in the microwave. Pour it into a bowl and stir in the cheese.
- 6 Add the sugar and egg yolks, and beat well.
- 7 Whisk the egg whites until they form soft peaks (standing up but not completely stiff, with edges that curl over). Then fold this into the mixture.
- 8 Pour the mixture over the top of the biscuit base. Bake in the oven for 25–30 minutes until the top of the mixture has set. Leave to cool.
- 9 Melt the rest of the butter in a pan over a low heat. Add the apricots and set honey. Cook for a few minutes, then leave to cool for 10 minutes. Then spoon on top of the cheesecake. Cool before serving.

Don't let the taxman keep your money
Do you pay tax? If so, your gift will be worth 25% more to us – at no extra cost to you. All you have to do is tick the box below, and the tax office will give 25p for every pound you give.

I am a UK taxpayer and I would like Macmillan Cancer Support to treat all donations I have made for the four years prior to this year, and all donations I make in the future, as Gift Aid donations, until I notify you otherwise.

I confirm I have paid or will pay an amount of Income Tax and/or Capital Gains Tax in each tax year, that is at least equal to the tax that Charities & CASCs I donate to will reclaim on my gifts. I understand that other taxes such as VAT and Council Tax do not qualify and that Macmillan Cancer Support will reclaim 25p of tax on every £1 that I give.

Macmillan Cancer Support and our trading companies would like to hold your details in order to contact you about our fundraising, campaigning and services for people affected by cancer. If you would prefer us not to use your details in this way please tick this box.

In order to carry out our work we may need to pass your details to agents or partners who act on our behalf.

Cancer is the toughest fight most of us will ever face. If you or a loved one has been diagnosed, you need a team of people in your corner, supporting you every step of the way. That's who we are.

We are the nurses and therapists helping you through treatment. The experts on the end of the phone. The advisers telling you which benefits you're entitled to. The volunteers giving you a hand with the everyday things. The campaigners improving cancer care. The community supporting you online, any time. The fundraisers who make it all possible.

You don't have to face cancer alone. We can give you the strength to get through it. We are Macmillan Cancer Support.
