Biographical Sketch:

I am a clinician, a pediatrician at the department of Pediatrics, based at Children's Hospital. I am involved in bedside teaching to students, residents and fellows. I am also involved in large group lectures to pediatricians in the community and allied health care personnel. I have special interest in fellows education, which involves mentoring and supervision during clinical/educational activities but also research, be it laboratory-based, clinical or transitional. I participate in a series of seminars aimed to teach the fellows how to advance in academic medicine.
