Biographical Sketch:

I am currently the chair of the Academy's Executive Council. My clinical role is as a hospitalist at Children's Hospital. I am the course director for the Science and Practice of Medicine 100 course, and I am the assistant clerkship director for the Pediatrics clerkship. In these roles, I spend a great deal of time with the students both in the clinical setting and in small and large group didactic sessions. I also teach residents in the clinical setting and give several noon conferences per year, specifically regarding Residents as Teachers and Clinical Reasoning topics. My primary area of interest is in teaching students and residents clinical reasoning skills, and I have developed and am studying new ways to teach the reasoning process. I am also very involved in the Council on Medical Student Education in Pediatrics, a national organization to improve the education of medical students. My husband and I are food and wine lovers who love to cook and watch the Saints. We have a new baby daughter, Ellie, who is lots of fun.
