Telephone: 504-568-5523

Fax: 504-568-8955

Biographical Sketch:

I am a native of New Orleans, having completed nearly my entire education here, except for my residency and fellowship training which I completed at New York University in New York city. I am also an alumni of LSU medical school. Becoming a faculty member of the radiology department here at LSU New Orleans has been a dream come true and I plan to show my appreciation of this opportunity through mentorship, excellence in clinical education, and through research. Currently, I am involved in multiple research projects with residents and medical students. Additionally, I participate in multiple interdisciplinary conferences including a gastrointestinal imaging conference which I will be hosting this year in conjunction with the LSU and Tulane gastroenterology fellows. My specific research interests are advanced gastrointestinal and genitourinary imaging, particularly prostate MRI and virtual colonoscopy. I love to teach and am always looking for ways to improve. My latest endeavors in radiologic research are grounded in teaching. Currently, I am working on simulation and its potential improvement in management of intravenous contrast reactions. I plan to explore similar endeavors utilizing simulation in radiology.

Educational Domains Represented in Academy Portfolio

- Teaching
- Curriculum Development, Instructional Design, and/or Assessment of Student Learning
- Advising and Mentoring
- Educational Leadership and Service
- Educational Research

Teaching/Education Expertise

Clinical teaching
