

**SPM 100 Clinical Forums on Communication, Professionalism, and Ethical Judgment
Evaluation Form for Small Group Forums**

Student _____

Date _____

Forums Faculty Leader _____

Group Number _____

EVALUATOR INSTRUCTIONS: Observation-based items are divided into 4 categories below and are aligned with many of our institutional program objectives. Consider all of the available opportunities during the Clinical and Ethics Forums for students to provide evidence of these expectations. These include individual role-plays and contributions to all of your Forums discussions in general.

Scoring: 5 = Outstanding (Consistently exceeds expectations for level of training)

4 = Very Good (Often exceeds expectations for level of training)

3 = Good (Meets expectations for level of training)

2 = Fair (Usually meets, but sometimes does not meet expectations for level of training)

1 = Poor (Does not meet expectations for level of training)

Observable Domain	Score				
Patient Care/Interviewing Skills (Program Objective 5): Gathers appropriate information via history taking. Obtains complete HPI and includes pertinent social, family, past medical history, and thorough review of systems when appropriate.	5	4	3	2	1
Patient-Physician Communication and Professionalism (Program Objectives 8, 14, 20): Uses active listening skills; supports the patient's emotional state and demonstrates empathy. Acts in patients' best interest; adapts approach to patients with consideration of age, ethnicity, gender, and cultural and health beliefs.	5	4	3	2	1
Professionalism – Integrity and Responsibility to Self and Others (Program Objectives 4, 19, 20, 21): Adheres to attendance policies and arrives on time; actively participates in and contributes to discussions; treats colleagues fairly and with respect; demonstrates adequate self-education and preparation for discussions; avoids external distractions e.g. texts, other course work during discussions.	5	4	3	2	1
Ethical Judgment (Program Objective 3): Demonstrates understanding of the core ethical principles (beneficence, nonmaleficence, autonomy, and justice) and core professional values (e.g. confidentiality, informed consent, duty to treat, disclosing errors); applies these principles and values to discussions of medical cases.	5	4	3	2	1
