

**List of Awardees for the 20th Neuroscience Center Retreat
May 10, 2008**

Abstract #

3. **Hitoshi Kuroda** *et al.*, LSUHSC, Neuroscience Center - Analysis of Constitutive and Cell Type-specific Promoters in the Adult Mouse Hippocampus following Lentivirus-mediated Gene Delivery

8. **Richard Wainford** *et al.*, LSUHSC Department of Pharmacology and the Cardiovascular Center of Excellence - In Hypertensive Dahl Salt Sensitive Rats Central Gi/o Protein Inhibition Potentiates Hypertension: A Protective Role for Central Gi/o Proteins

17. **Ni Fan** *et al.*, LSUHSC, Neuroscience Center - Single and Chronic *in vivo* Exposures to 9-Tetrahydrocannabinol Induce Bidirectional Alterations in Hippocampal Long-Term Potentiation

34. **Srisairam Achuthan** *et al.*, LSUHSC, Neuroscience Center - Phase Resetting Curves can Predict the Network Activity of all to all Networks with Pulsatile Coupling

35. **Tiffany Niemoller** *et al.*, LSUSHC, Neuroscience Center - Neuroprotective Messengers Neuroprotectin D-1 and Resolvin E1 in Experimental Stroke

39. **Na Li** *et al.*, LSUSHC, Neuroscience Center and Ophthalmology - The Resolvin E1 Analogs, RX-10065 and RX-10005 Improve Tear Production and Decrease Inflammation in a Mouse Dry Eye Model

43. **David Stark** *et al.*, LSUSHC, Neuroscience Center - Image Analysis of Nuclear Morphology in an *in vivo* Model of Excitotoxicity

44. **Rajee Antony** *et al.*, LSUHSC, Neuroscience Center - *trkA* Receptor – Dependent Regulation of Bcl-xl Expression: Implication in Age-Related Macular Degeneration

50. **Maria Soledad Cortina** *et al.*, LSUHSC, Department of Ophthalmology and Neuroscience Center - PEDF Plus DHA Enhances Corneal Nerve Regeneration after Experimental Surgery

58. **Long Li** *et al.*, LSUHSC, Neuroscience Center - Lipoxin Inhibits Apoptotic Cell Death and Pro-Inflammatory Gene Expression induced by Oxidative-stress in Retinal Pigment Epithelial (ARPE-19) Cells
