

### **Lee Happel Lectureship**

Lee Happel, PhD has devoted 39 years of service and training to those training in the Departments of Neurosurgery and Neurology. Lee remains passionate about medical education as evidenced by his continued residency supervision. He still actively participates in the education of our Neurosurgery residents and provides state of the art neurophysiological intra-operative monitoring. To honor Lee and all of his contributions, an annual lectureship has been established in his name. Each year an expert in the field of Neurophysiology comes to the LSU Health Sciences Center to give a lecture and educate faculty, residents and research staff on the latest findings in this field of research.

Donations to help fund this annual lectureship can be made payable to the **LSU Medical Alumni Association** (re: Happel Lectureship) and mailed to Frank Culicchia, MD, LSUHSC-Neurosurgery Department, 2020 Gravier Street, Room 324, New Orleans, LA 70112.

### **Raymond Dahl Lectureship**

Raymond Dahl, MD was a resident within the Neurosurgery program. Following his untimely death, the department established a lectureship in his memory. Funds from this lectureship are used to support the invitation of an eminent scholar in Neurosurgery to hold an educational conference with the residents and deliver a presentation of his/her research/clinical experience.

Donations for this fund can be made payable to the **LSUHSC Foundation** (re: Raymond Dahl Lectureship) and mailed to Frank Culicchia, MD, LSUHSC-Neurosurgery Department, 2020 Gravier Street, Room 324, New Orleans, LA 70112.
