

## Hosting an Oral Cancer Screening Event

Our goal is to increase awareness of oral cancer through free screenings that also offer access of expert medical professionals to the general population without the hassles of insurance, referral needs, and registration.

The screenings are quick and easy. After only a few minutes, the patient will receive an evaluation and any other information that may be helpful to them. The screening can take place at any location with minimal set-up.

This is a purely voluntary event. There are no official reports given to patients or invasive procedures performed. However, we are happy to give out additional information on the problem and, if we come across a finding of genuine concern, then we would advise referral to the appropriate physician.

The **duration of the event** may vary. Below are the following options:

- One-Day Screening: 3-4 hours
- Two-Day Screening: 2 hours each day

### **Scheduling the date of the screening:**

If you wish to have the screening during operating hours, then a Monday or Friday would be best. However, we are also available after business hours from 5pm-7pm on Monday, Tuesday, and Friday.

### **Infrastructure required at venue:**

- Space Indoors (5 Ft x 5 Ft)
- Small table and two (2) chairs

### **Additional Permissions:**

- Poster display on easel to notify customers of event
- Advertising
  - LSU will advertise the event. However, the host institution may advertise as well, if desired.

**There is no cost involved to the institution to host the event.** However, charitable donations are accepted to fund future oral cancer screening events.
