LSUHSC hosts AMA leader

Dr. Peter Carmel, the 166th President of the American Medical Association, spent an afternoon at LSU

Health Sciences this week. He gave a special address to LSUHSC faculty, residents, staff, and students on the role of the AMA in medical education. He spoke in depth about the AMA Center for Transforming Medical Education and the goal of improving professionalism and patient care as he identified and discussed challenges for medicine and medical education in the changing environment.

Drs. John Paige & Deborah Garbee with Dr. Carmel

Dr. Carmel also took a tour of the Cohn Student Learning and Klein Advanced Practice Centers – 30,000 sq. ft. of the nation's most advanced and comprehensive simulation-based health training environments.

LSUHSC salutes its veterans

This Veterans Day, LSU Health Sciences Center held a recognition ceremony to honor veterans who are LSUHSC faculty, staff, and students. The event was suggested by Daniel Logsdon, President of the LSUHSC Medical School Class of 2014.

Veterans gathered at the flagpole in front of 2020 Gravier on our campus. Vice Chancellor Ron Gardner, a Vietnam vet, welcomed his military colleagues, and spoke about the significance of service to our country. The group then posed for a photo to mark the occasion.

Dan Logsdon, Ron Gardner

LSU Health Sciences Center is grateful for the sacrifice and service of our veterans, and proud that they have chosen to carry it forward to a lifetime of service as academic and health professionals.

Scientists come to LSUHSC for latest on fish oil

About 60 scientists from around the world gathered at the LSUHSC Neuroscience of Excellence this week to learn more about the growing evidence of the importance of DHA in health. The 3-day meeting was devoted entirely to this omega-3 fatty acid found in fish oil in translational medicine.
