

**Louisiana State University Health Sciences Center
School of Medicine - Research Enhancement Program (REP)
BRIDGE GRANT APPLICATION**

General Information

The purpose of bridge grant support is to allow faculty members to maintain research activities during a temporary break in extramural support. Applications will be viewed in terms of their scientific merit and the probability of securing extramural funding from National agencies. Bridge grant support receives the highest priority among eligible School of Medicine Research Grant applications. The duration of these projects is for up to two years. However, the second year of funding is contingent on both the scope of the project, and submission of a progress report demonstrating productivity on this proposal.

Eligibility

All full-time faculty of LSUHSC-New Orleans who have had extramural research grant support within the last 3 years are eligible to apply for this grant program.

Application Format

1. *Title Page* (please use the [Title Page](#) template).
 - a. Title of the research project
 - b. Applicant information (name, degree, academic rank, campus address, e-mail address, and telephone number)
 - c. Please provide the funding agency of the previously funded grant (i.e. the grant that is being bridged). Also, include the anticipated submission date for the extramural grant.
 - d. Signature of applicant
 - e. Signature of Department Head, with dates.
2. Abstract (limited to 250 words)
3. Specific Aims. Provide a concise description of the research aims to be addressed during the interim period requested.
4. *Research Strategy* (***limit of 6 pages***). The goal of this section is to provide a detailed description of the rationale, experimental design, anticipated results and the problems and alternative approaches for the REP project (not necessarily for an entire extramural proposal).
 - a. Significance (recommend 1-2 pages) The goal of this section is to present the rationale for the proposed research and to summarize the literature supporting this line of investigation.
 - b. Innovation (recommend ½ page)
 - c. Approach (recommended 3-4 pages)

- i. Experimental design
 - ii. Anticipated results
 - iii. Problems and alternative approaches
5. *Proposed Budget* – Investigators will need to provide an overall itemized budget for the first year of the project, and a second year if they believe it will be needed. The budgets should include personnel, equipment (if required), supplies, and other expenses (such as publication costs). Travel will only be considered as an integral part of data gathering. The total period of support cannot exceed two years, and the annual award cannot exceed \$75,000 per year. Salary support for **clinical faculty** can be requested as release time from their clinical duties. The salary support requested for all clinical faculty involved with the proposal cannot exceed \$25,000, including fringe benefits (currently \$17,730 salary plus \$7,270 fringe – at 41%). No-cost extensions of up to six months will be considered on request to the Associate Dean for Research (currently Dr. Wayne Backes wbacke@lsuhsc.edu). No expenditure of award funds can occur past the grant award period and the approved no-cost extension. The form page can be obtained at this link ([REP Grant budget page](#)).
6. *Budget Justification*. A budget justification must accompany each budget. It is important that the budget be appropriate for the scope of the study. In addition to the scientific merit of the proposal, both the duration and amount of funding requested will be reviewable by the study section.
7. *Plans for Obtaining Extramural Support* – Describe your plans to obtain renewal support for this proposal. Please include the targeted funding agencies and the anticipated time frame for submission of these extramural proposals. **Include the Specific Aims that are planned for the extramural grant that will be submitted.**
8. Summary Statement from the most recent review by NIH, NSF, or other national agency review panel if available. This section should also include responses to the comments of the reviews. The purpose of the Bridge Grant mechanism is to provide support while a revised grant application is prepared for submission. In unusual cases, the applicant may submit a REP application to facilitate the development of a closely-related, new proposal instead of a revised grant application.
9. Current Research Support. List all current research support by agency number, title, and total direct costs awarded. They should also identify any departmental, institutional, or startup funding that they may have.
10. NIH-type biographical sketch. The form page can be obtained at this link ([RIP Biosketch](#)).

11. The signed original application (by both applicant and department head), and an electronic version of the proposal should be submitted to the Chair of the Institutional Grant Review Committee (pwinsa@lsuhsc.edu).

The proposal must be submitted electronically as a **single** pdf. The title page must have all signatures to be advanced to the review stage. This proposal should be submitted to the Grant Evaluation Committee through SOM Research email (SOMResearch@lsuhsc.edu).

ALL APPLICATIONS MUST BE COMPLETE, INCLUDING ALL COMPONENTS LISTED ABOVE WITH ALL REQUIRED SIGNATURES AND DOCUMENTS PROVIDED ON THE ORIGINAL AT THE TIME OF SUBMISSION. APPLICATIONS MUST BE WITHDRAWN IMMEDIATELY UPON NOTIFICATION OF FUNDING BY AN EXTRAMURAL AGENCY.

Grant Deadlines

There are three competitions per year. The deadlines are March 9th, July 9th, and November 9th.

Evaluation of Grant Proposals

Grant proposals will be reviewed by the Internal Grant Review Committee comprised of scientists who are members of the LSUHSC faculty. This grant review committee will operate in a manner similar to NIH study sections. The criteria to be evaluated will include (1) scientific merit and significance of the proposed project; (2) qualifications and productivity of the applicant; (3) potential for securing support from National agencies; (4) appropriateness of funding for this mechanism; and (5) appropriateness of the budget. The committee will score proposals, and make a recommendation to the Dean of the School of Medicine.

Reporting

Request for second year funding – For two-year grants, the second year funding is contingent on adequate progress from the first year of support, and requires the submission of a 1-2 page non-competing renewal. This renewal application must include a short summary and evidence of productivity, particularly a list of grants submitted, new summary statements, and a list of manuscripts and abstracts published, in press, or submitted over the prior grant period. The 2nd-year funding request should be sent electronically to the coordinator of the REP (SOMResearch@lsuhsc.edu), **clearly indicating in the subject line the program name (i.e. HSC-WIRP), the name of the PI, and that this is a request for second-year funding.**

Final report – The principal investigator is responsible for submitting a final report within 3 months after completion of the grant. This report should include a one to two page summary of the progress made on the proposal, a list of manuscripts and abstracts

published during this time, and a list of the grant applications submitted and their funding status. This information should be sent electronically to the administrative coordinator of the REP Program (SOMResearch@lsuhsc.edu), **clearly indicating in the subject line the program name (i.e. REP Bridge Grant), the name of the PI, and that this is a final report.** It is important for documentation of the success of this program and future requests for funding that we receive any information on grants that were funded with assistance from this program. Publications resulting, in whole or in part, from this award should appropriately acknowledge the support.

Termination

An awardee should promptly notify the Associate Dean for Research of the School of Medicine (wbacke@lsuhsc.edu) of any change in their status as a member of the full-time academic staff. The award will terminate on the date of the change to ineligible status. REP awards may not be transferred to other principal investigators or to other institutions. In the event that this project receives extramural support, the Associate Dean for Research should be notified immediately, and the unexpended funds from the REP grant are to be returned.
