

Clinical Psychology Internship Training

LOUISIANA STATE UNIVERSITY HEALTH SCIENCES CENTER
SCHOOL OF MEDICINE

Department of Psychiatry, Section of Psychology

New Orleans, Louisiana

**Accredited by the American Psychological Association
Commission on Accreditation
750 First Street, NE,
Washington, DC 2002-4242
(202) 336-5979**

July 1, 2024 to June 30, 2025

https://www.medschool.lsuhsu.edu/psychiatry/clinical_psychology

The psychology internship affords you the opportunity to consolidate and refine your existing clinical skills, develop new ones, and get exposure to diverse population of individuals and their families. This brochure will highlight many aspects of the training experience here at LSUHSC. We take particular pride in teaching and training interns in clinical psychology. On behalf of the faculty and staff at LSUHSC, we look forward to the opportunity to train future psychologists.

Should you have any questions or need additional information, please do not hesitate to contact me or our Program Coordinator, Ms. Jennifer Olivarez at 504-568-2537. Additionally, should the applicant have complaints about the LSUHSC internship or internship process, they are welcome to call the Education Directorate of the American Psychological Association at 202-336-5979.

Best wishes,

Dani Archie, Ph.D.
Training Director of Clinical Psychology Internship Program

Danielle Cohn, Ph.D.,
Associate Training Director of Clinical Psychology Internship Program

LSUHSC SCHOOL OF MEDICINE IN NEW ORLEANS

Louisiana State University Health Sciences Center School of Medicine New Orleans (LSUHSC-NO) is located in a large medical complex covering ten square blocks of downtown New Orleans. It has six, individual professional schools: Medicine, Dentistry, Nursing, Allied Health Professions, Public Health, and Graduate Studies. The school was opened October 1, 1931, in a nine-story building adjacent to the 2200-bed Medical Center of Louisiana at New Orleans (MCLNO; formerly known as Charity Hospital of New Orleans). Historically, MCLNO has been, and continues to be, one of the major teaching hospitals in the south. LSUHSC-NO has statewide teaching, research, and health care functions, and is affiliated with more than 100 hospitals and various health care institutions regionally, nationally, and internationally. In July 1997, LSUHSC took over the responsibility of administrating the MCLNO Charity Hospital System.

Within the past three decades, LSUHSC has expanded its facilities substantially. In 1984, the School of Allied Health Professions was established. The 12-million-dollar Louisiana Lions' Eye Center was completed in 1986, which serves as a clinical and research center for the Department of Ophthalmology, and houses outpatient clinics for the School of Medicine. An eight-story Resource Center opened in July of 1988, which includes a modern computer center and a health sciences library.

In 2001, an 8-million-dollar Clinical Sciences Research Building (CSRB) was completed, which provides lab and research facilities for the medical staff including state-of-the art simulation labs and conference rooms. In 2003, the School of Public Health was added.

In addition to its outstanding clinical facilities, LSUHSC has emerged as a major center for research, receiving over 37 million dollars in research support funds in 2001. In its long history of education, research, and service to the public, Louisiana State University Health Sciences Center is one of the major academic facilities in the South.

After being heavily damaged by Hurricane Katrina on August 29, 2005, Charity Hospital closed. Hospital services were provided at the Interim Louisiana Hospital until August 2015 when the new state of the art University Medical Center was completed.

THE DEPARTMENT OF PSYCHIATRY

Rahn Bailey, M.D., is a psychiatrist who has served as Chair of the Department of Psychiatry at LSUHSC since June 2021. The Department is committed to the finest quality medical student education, post-medical school training for residents and fellows in all aspects of psychiatry: general psychiatry; infant, child and adolescent psychiatry; emergency and administrative psychiatry; psychosomatic medicine, and consultation liaison psychiatry. We also provide excellent graduate and post-graduate training in social work and psychology. The department provides major leadership in research spanning our field and makes important advances in the understanding of psychopharmacology and neuroscience, developmental disorders, psychodynamic psychiatry, and treatment of children and families exposed to community and family violence.

After hurricanes Katrina and Gustav, the Department played key roles in the State's Crisis Response Program in providing mental health services throughout metropolitan New Orleans including services for first responders and their families, in meeting the mental health needs of returning and displaced children and their families, and in rebuilding communities' mental health infrastructure. We take much pride in the department's contributions to our community, the region and the state. Departmental programs at all stages in the life cycle make important contributions to enriching our community and serve as models for other areas of the country. We welcome you to our department and hope that you may find it an exciting place for the next step in your career.

THE PSYCHOLOGY SECTION

Dr. Michelle Moore has served as Chief of the Section of Psychology since 2022. The Psychology Section is comprised of a core faculty consisting of 15 doctoral level psychologists licensed to practice psychology in the state of Louisiana. They are a diverse group with varying clinical orientations, including behavioral, cognitive, developmental, psychodynamic, psychoanalytic, and multicultural theories. The psychology faculty strives to integrate contemporary views of biological, psychological, and social bases of human behavior with their respective areas of expertise. Psychologists at LSUHSC-NO engage in some blend of administration, teaching, research, practice, and supervision. Psychologists typically teach and supervise some combination of psychology interns, medical students, psychiatry residents, child psychiatry fellows, and/or social work fellows.

The Psychology Section is further enriched by 10 psychologists from the greater New Orleans metropolitan area who are members of the Adjunct Clinical Faculty in the LSUHSC-NO Department of Psychiatry. The LSUHSC-NO Psychology Section enjoys a congenial and collaborative interaction with academic psychologists from other local institutions and with private practice psychologists.

CORE FACULTY OF THE CLINICAL PSYCHOLOGY INTERNSHIP

Dani Archie, Ph.D. (he/they) (2014, Counseling Psychology, University of Central Arkansas). Dr. Archie is an Assistant Professor of Clinical Psychiatry at LSU Health Sciences Center and currently serves as the Training Director for the Psychology Internship Program. Prior to joining the LSUHSC faculty in April of 2023, he provided psychological services in Community Mental Health and University Counseling settings and was an instructor for graduate and undergraduate psychology courses. Dr. Archie currently provides individual and group psychotherapy for adults at UMC Behavioral Health Clinic, as well as psychological services at the LSU Behavioral Sciences Center. One of Dr. Archie's personal and professional passions is improving health in the transgender and non-binary community. Their research experience includes several grant-funded community-based participatory research projects aimed at identifying and addressing the healthcare needs of a trans community with limited access to gender-affirming care. Dr. Archie also has extensive experience educating mental health, medical, nursing, allied

healthcare, and healthcare administration providers, professionals, trainees, and students on gender-affirming care.

Shane Bierma, Ph.D. (2019, University of Tennessee, Doctor of Philosophy in Clinical Psychology; 2019, Post-Doctoral Fellow, LSUHSC). Dr. Bierma is an Assistant Professor of Clinical Psychiatry for LSUHSC and provides clinical and training services in the behavioral health psychiatric inpatient and HIV outpatient (HOP) departments at UMCNO. Her interests include neuropsychological assessment and research of cognitive decline and memory impairment in individuals living with HIV and impacts of health comorbidities within this population. Additionally, she does research on factors of identity on retention in STEM across three Southeastern Universities with the support of NSF funding. She teaches about intersectionality of identity and culturally competent healthcare, along with health equity and psychodynamic psychotherapy. She is involved in psychology intern and psychiatry resident training and clinical supervision including assessment, psychotherapy, and working with underserved populations. Dr. Bierma specializes in working with the GSM community, including gay men and trans individuals. She provides evaluations and transition psychotherapy for HRT and gender affirming surgery, and training and clinical supervision in this specialty area.

Nathan H. Brown, Psy.D. (2020, Clinical Psychology, Roosevelt University; 2020 Post-Doctoral Clinical Psychology Fellow, Louisiana State University Health Sciences Center Department of Psychiatry). Dr. Brown is a Licensed Clinical Psychologist, Assistant Professor of Clinical Psychiatry for LSU Health Sciences Center (LSUHSC) and the dedicated Psychologist at the Burn Center at University Medical Center, New Orleans (UMCNO). He earned his doctorate in Clinical Psychology from Roosevelt University (dissertation title: Reliability and validity of a Spanish Translation of the Racial Microaggressions Scale). Dr. Brown provides clinical services in English and Spanish, and specializes in the psychological assessment and treatment of patients in both outpatient and integrated medical settings. Dr. Brown works in the UMCNO Behavioral Health Clinic, in general mental health and the Intensive Outpatient Program, and the UMCNO Burn Center, providing psychological care to inpatient and outpatient burn survivors. His professional interests include health psychology, psychotherapy with Latinx patients, clinical supervision, and multicultural competence in mental health treatment.

Danielle Cohn, Ph.D. (2019, American University, Doctor of Philosophy in Clinical Psychology; 2019, Post-Doctoral Fellow, Louisiana State University Health Sciences Center): Dr. Cohn is an Assistant Professor of Clinical Psychiatry at LSUHSC. She received her Ph.D. in Clinical Psychology from American University, and completed both her predoctoral internship and postdoctoral fellowship at LSUHSC. Dr. Cohn has extensive clinical training and experience in providing Dialectical Behavior Therapy (DBT) across a variety of settings, including psychiatric residential, community mental health clinic, and outpatient settings. Dr. Cohn specializes in providing evidence-based treatment to adolescents and adults. Dr. Cohn is the lead psychologist in the UMCNO Cancer Center as well as one of the psychologists for Psychiatric Inpatient Services at UMCNO. Currently, Dr. Cohn also provides psychological services in the UMCNO Center for Weight Loss and Bariatric Surgery. Dr. Cohn's clinical and research interests include personality disorders, psychological trauma, and health psychology.

Richard Costa, Psy.D., M.P. (2002, Argosy University, Georgia School of Professional Psychology, Doctor of Psychology in Clinical Psychology; 2003, Post-Doctoral Fellow in Clinical Psychology and Infant Mental Health, Louisiana State University Health Sciences Center Department of Psychiatry; 2011, Alliant International University, California School of Professional Psychology, Postgraduate Master of Science in Clinical Psychopharmacology): Serves as Associate Director of Post-Doctoral Education. Interests: Trauma/rural trauma, HIV prevention, ADHD assessment and treatment, childhood trauma and resilience, parent/child psychotherapy, multicultural competence, Medical Psychology/Clinical Psychopharmacology, and Gay, Lesbian, Bisexual and Transgendered (GLBT) issues. Primary Clinical Settings: LSUHSC School of Medicine, Trauma and Disaster Coalition for Child and Family Resilience Project (TDC4 CFR)

Sebastián Del-Corral-Winder, Psy.D. (He/His/Him) (2021, Clinical Psychology, University of Indianapolis; 2022, Infant Mental Health Post-Doctoral Fellow, LSUHSC). Dr. Del Corral is a Licensed Clinical Psychologist and an Assistant Professor of Clinical Psychiatry at LSUHSC. Dr. Del Corral provides services in Spanish and English, is rostered as a Child-Parent Psychotherapy (CPP) clinician, and is certified in Trust-Based Relational Interventions (TBRI). Dr. Del Corral is an active member of the LSU Infant Team where he provides services to families and young children (0-5y) who are in the foster care system. Dr. Del Corral also provides outpatient clinical services through the Behavioral Health Center (BSC) and through a federally qualified health center (InclusivCare). Dr. Del Corral specializes in providing clinical services to young children through attachment-based and play therapy treatments and provides services to adults through a psychodynamic and humanistic lens.

In addition to his clinical roles, Dr. Del Corral is the co-Director of Pre-Doctoral Practicum Training with Dr. Rinner and is the Director of the Latino Health Scholars program, which focuses on providing training and education in Spanish for medical students. Dr. Del Corral provides supervision and educational activities to psychology and psychiatry trainees and serves in national committees investigating racial and cultural disparities and inequalities in the foster care system. Outside of his professional roles, Dr. Del Corral enjoys exploring the culinary diversity of New Orleans with his dog and watching local sports (Let's go Pels!).

Amy B. Dickson, Psy.D. (1998, Clinical Psychology, Nova Southeastern University; 1998-1999, Postdoctoral Fellow in Infant Mental Health and Trauma work, Louisiana State University Health Sciences Center): Dr. Dickson is an Assistant Professor of Clinical Psychology at LSUHSC and is the Psychology Section Deputy Chief and the Child Coordinator of the Psychology Internship Training Program. She co-directs the Harris Infant Mental Health training with Dr. Joy Osofsky, is a Child-Parent Psychotherapy trainer, and is the Director of the Orleans Parish Infant Team which treats children ages 0-5 years in the foster care system. She is part of a Safe Baby Court and trains around the country on infant mental health and court team work. Dr. Dickson consults to local child protection agencies, and sees clients at the Behavioral Sciences Center and at a federally qualified health clinic (NOELA). Dr. Dickson specializes in trauma.

Sandy Hyatt, Psy.D. (2020, The Chicago School of Professional Psychology, Doctor of Psychology in Clinical Psychology; 2020, Post-Doctoral Fellowship, Louisiana State University Health Sciences Center): Dr. Hyatt serves as an Assistant Professor of Clinical Psychiatry at LSUHSC. She currently provides clinical services at University Medical Center as a part of the Trauma Psychology team and at UMC's Behavioral Health Clinic. Dr. Hyatt has extensive training and experience treating patients struggling with psychological trauma as well as severe and persistent mental illness. Dr. Hyatt also engages in the training and education of psychology trainees and psychiatry residents. Her professional and clinical interests also include health psychology, programmatic development, increasing access to treatment for underserved populations, and trauma-informed care and multidisciplinary collaboration in holistic patient-centered treatment.

Philip T. Griffin, Ph.D. (1975, Clinical Psychology, University of South Carolina) : Dr. Griffin received his PhD in Clinical Psychology from the University of South Carolina in 1975 with internship from Indiana University Medical School, Department of Psychiatry. Dr. Griffin is a licensed psychologist (1978) and clinical neuropsychologist (1995). Currently, Dr. Griffin is Professor of Clinical Psychiatry and Chief of the Division of Psychology. Prior to joining the LSUHSC Department of Psychiatry in June of 2007 Dr. Griffin was full time faculty at Tulane University Medical Center where he was instrumental in developing that institution's first Predoctoral Internship in Clinical Psychology, APA accredited in 1983. Dr. Griffin was awarded the Diplomate in Clinical Psychology from the American Board of Professional Psychology (ABPP) in 1987 and became a Fellow of the Academy of Clinical Psychology in 1994. He was President of the Louisiana Psychological Association (LPA) in 1993 and received the Distinguished Career Award from the Louisiana Psychological Association in 1995. He was elected president of LPA again in 2009. Dr. Griffin was appointed by the governor of Louisiana to the Louisiana State Board of Examiners of Psychologists in 2013 and served through 2018. Dr. Griffin's clinical activity has revolved around serving the underprivileged and underserved primarily on adult inpatient psychiatry units. For over twenty years as Tulane faculty Dr. Griffin was a staff psychologist and director of psychological services at Charity Hospital of New Orleans, the primary teaching hospital for both Tulane and LSU prior to Hurricane Katrina. Currently Dr. Griffin serves as psychologist/neuropsychologist at the LSUHSC HIV Outpatient Program (HOP).

Kimberly N. Kent, PhD, MSCP (Doctor of Psychology in Counseling Psychology, University of Tennessee; Master's degree in Community Counseling, Winona State University; Post-Doctoral Master's Degree in Clinical Psychopharmacology, Fairleigh Dickinson University): Dr. Kent is an Assistant Professor of Clinical Psychiatry and serves as Director of the Psychology Post-Doctoral Fellowship Program at LSUHSC. At UMCNO Dr. Kent provides psychotherapy services in the Gastroenterology Program specializing in collaborative inter-disciplinary team treatment of IBS and IBD. Dr. Kent also conducts psychological clearance evaluations, targeted pre-operative intervention, and post-operative follow up care for the Bariatric Health Program. Her Clinical orientation is integrative utilizing a psychodynamic frame. Interests include medical rehabilitation psychology, clinic and program directorship, severe mental illness and personality disorders with multiple co-morbidities (including intellectual disability and substance abuse), community mental health, college teaching, and student supervision. Dr. Kent is an experienced director in community, academic, and medical settings. She has extensive clinical

experience working with patients undergoing health issues such as traumatic brain injury, spinal cord injury, stroke, cancer, cardiac events, gastroenterological abnormalities, and orthopedic injury.

Dr. Kent is responsible for creating and implementing a collaborative inter-disciplinary inpatient medical rehabilitation model that resulted in statistically significant increases in functional independence of patients in multiple medical units. Dr. Kent also has expertise in the treatment of memory care patients who have dementias including Alzheimer's, Lewy Body, vascular, and frontotemporal, as well as memory changes due to Korsakoff's syndrome and chronic traumatic encephalopathy. She has conducted numerous workshops for medical staff, caregivers, and family members of medically complex patients. In addition to her role at LSUHSC and UMCNO, Dr. Kent is a product development consultant, providing expertise on aging and related physical and cognitive changes and is on the Medical Advisory Board for an international company.

Michelle B. Moore, Psy.D. (2009, Clinical Psychology, Pace University; 2009 Post-Doctoral Clinical Psychology Fellow, Louisiana State University Health Sciences Center Department of Psychiatry): Dr. Moore is currently a Associate Professor of Clinical Psychiatry at LSUHSC and serves as Training Director of the Psychology Internship Program. In 2019, she was awarded the Anderson/Searle Professorship. She specializes in complex trauma with children, infant mental health and school-based populations. Dr. Moore received her master's degree in School Psychology and her doctoral degree in Clinical Psychology from Pace University in New York, NY. She provides outpatient services at the LSU Behavioral Sciences Center and provides consultation and evaluation services to charter schools in the New Orleans area. Her interests include the psychological effects of complex trauma on children, adults and families in both outpatient and school settings. In addition to her clinical role, Dr. Moore is currently the Vice Chair of the Louisiana State Board of Examiners of Psychologists as well as co-chair of the Faculty Development and Evaluation Committee and the Junior Faculty Guidance and Mentoring Committee for the School of Medicine at LSUHSC.

Joy D. Osofsky, Ph.D. (1969, Clinical Psychology, Syracuse University; 1976-1978, Postdoctoral Fellow in Clinical Psychology, The Menninger Foundation; 1976-1985, Psychoanalytic Training, The Topeka Institute for Psychoanalysis): Dr. Joy Osofsky is a psychologist and psychoanalyst and Professor of Pediatrics and Psychiatry at Louisiana State University Health Sciences Center in New Orleans. She is Head of the Division of Pediatric Mental Health. She is also an Adjunct Professor of Psychology at the University of New Orleans. Dr. Osofsky has been Co-Director of the Louisiana Rural Trauma Services Center, a center in the National Child Traumatic Stress Network, a member of the Early Trauma Treatment Network of NCTSN, and Director of the LSUHSC Harris Center for Infant Mental Health in New Orleans. She is editor of *Children in a Violent Society* (Guilford, 1997; paper, 1998), two editions of the *Handbook of Infant Development* (Wiley, 1979; 1987), and co-editor of the four volume *WAIMH Handbook of Infant Mental Health*. Dr. Osofsky's 2004 (paperback 2007) edited book, *Young Children and Trauma: Intervention and Treatment*, includes contributions related to mental health, child welfare, the judiciary, and law enforcement. In 1995, she published an article, *The Effects of Violence Exposure in Young Children* (*American Psychologist*, 1995) that was chosen by the American Psychological Association as one of the top articles published in this journal in the past 50 years. Dr. Osofsky is also a

previous editor of the *Infant Mental Health Journal*. Dr. Osofsky is Past-President of Zero to Three: National Center for Infants, Toddlers, and Families and Past-President of the World Association for Infant Mental Health. She served on the Pew Commission for Children in Foster Care. For several years, she consulted with Judge Cindy Lederman, Administrative Judge of the Juvenile Court in Miami/Dade County related to the development and evaluation of programs to benefit high-risk young children and families in court. In May 2006, Dr. Osofsky was honored by the Juvenile Court Judges of the 11th Judicial Circuit, Miami-Dade, Florida with the Child's Heart Award in recognition of contributions to enhancing the health and well-being of children.

Lindsey Poe, Psy.D. (2014, George Washington University, Doctor of Psychology in Clinical Psychology; 2014, Post-Doctoral Fellow, Louisiana State University Health Sciences Center): Dr. Poe is an Assistant Professor of Clinical Psychiatry at LSUHSC. She serves as Didactics Coordinator in the Psychology Internship Program and additionally is part of the Group Assessment Supervision team. Dr. Poe specializes in psychodynamic psychotherapy, group therapy, and psychological assessment. Currently, Dr. Poe is one of the lead psychologists for Psychiatric Inpatient Services at UMC-NO. She additionally is the bariatric psychologist at UMC-NO's Center for Weight Loss and Bariatric Surgery and provides psychotherapy at the LSU Behavioral Sciences Center. Her interests include severe and persistent mental illness, complex trauma, and the effects of physical health on mental wellness.

Erika Rajo, Psy.D. (2016, Clinical Psychology, Pepperdine University; 2017 Post-Doctoral Clinical Psychology Fellow, Louisiana State University Health Sciences Center Department of Psychiatry) Dr. Rajo is a Licensed Clinical Psychologist, Assistant Professor of Clinical Psychiatry for LSU Health Sciences Center (LSUHSC) and the Trauma Psychologist at University Medical Center, New Orleans (UMCNO). She earned her doctorate in Clinical Psychology from Pepperdine University and completed both her pre-doctoral internship and postdoctoral fellowship training at LSUHSC. Dr. Rajo specializes in the psychological assessment and treatment of patients in an integrated medical setting. She also has extensive training and clinical experience in the treatment of psychological trauma and has been working with patients experiencing trauma-related difficulties since 2011. As the UMCNO Trauma Psychologist, Dr. Rajo, along with her trainees, collaborate with patients' interdisciplinary treatment teams to assess for symptoms of PTSD, depression, and substance abuse. Dr. Rajo and the Trauma Psychology team utilize this assessment to inform their provision of brief therapeutic interventions, referrals at the time of discharge, and follow-up outpatient behavioral health services in the UMCNO Trauma Recovery Clinic for patients and their families. Dr. Rajo's professional and clinical interests also include multicultural issues in mental health treatment and increasing access to treatment for underserved populations.

Amy E. Rinner, Psy.D. (2021, Clinical Psychology, Regent University; 2021-2022, Postdoctoral Fellow in Perinatal and Infant Mental Health and trauma work, Louisiana State University Health Sciences Center). Dr. Rinner is an Assistant Professor of Clinical Psychiatry at LSUHSC and is the Program Coordinator for the Harris Infant Mental Health training program. Dr. Rinner specializes in working with children and youth, particularly young children ages 0-5. Dr. Rinner is trained in TF-CBT, CPP, and TBRI and has been an active member of the LSUHSC Infant Team since 2020. Dr. Rinner enjoys consulting with local and

statewide DCFS agencies regarding children in foster care and DCFS worker wellness. Dr. Rinner also serves in a supportive training role with LSUHSC psychology predoctoral interns at Metropolitan Human Services District in child and youth services. Dr. Rinner co-directs practicum student training with Dr. Sebastian Del Corral-Winder.

William S. Walker, Ph.D. (2002, Long Island University, New York; 2007, Infant Mental Health Fellowship, Louisiana State University Health Sciences Center Department of Psychiatry): Dr. Walker is an Assistant Professor of Clinical Psychiatry in the Department of Psychiatry. His interests include psychodynamic psychotherapy, psychoanalysis, chronic mental illness, and training and supervision of psychology interns and psychiatry residents. Dr. Walker teaches psychology interns and psychiatric residents on topics such as supportive psychotherapy, group psychotherapy, and psychodynamic psychotherapy. Dr. Walker also provides clinical supervisor to psychiatry residents and psychology interns.

OTHER AGENCY/INSTITUTION SUPERVISORS ACTIVE ON CLINICAL FACULTY IN PSYCHOLOGY INTERNSHIP TRAINING

Stephen Anen, Ph.D. Adult Psychotherapy Supervisor (2012, Clinical Psychology, The Graduate Center - City University of New York, New York, NY). Currently in private practice in New Orleans, LA and an active member of the New Orleans-Birmingham Psychoanalytic Center.

Ronald Cambias, Psy.D., Child and Adolescent Outpatient Supervisor, Lecturer (1991, Clinical Psychology, Nova Southeastern University - Ft. Lauderdale, Florida). Currently in private practice in New Orleans, LA.

Melissa Dufrene, Psy.D. Child and Adolescent Outpatient Supervisor (2012, Clinical Psychology, The School of Professional Psychology at Forest Institute in Springfield, Missouri; 2013, Postdoctoral Fellowship at Rogers Memorial Hospital) Adjunct Professor at the Chicago School of Professional Psychology at Xavier University of Louisiana and currently in private practice in New Orleans, LA.

Diane Franz, Ph.D., Child and Adolescent Outpatient Supervisor, New Orleans Children's Hospital (1996, Clinical Psychology, University of Mississippi, Oxford, MS; 1996, Clinical/Pediatric Psychology Postdoctoral Fellowship, Georgetown University Medical Center, Washington, DC). Currently Director of Psychology Department at Children's Hospital in New Orleans. Special interests include: Diabetic compliance, adjustment to chronic disease, childhood cancer, early child development.

Shannae Harness, Ph.D., Child and Adolescent Outpatient Supervisor (2012, Clinical Psychology, Jackson State University in Jackson, MS; 2013, Postdoctoral Fellowship at Family Focus in Baton Rouge, LA). Currently in practice at Oschner Health – Main Campus in New Orleans, LA. She is credentialed through the National Register of Health Service Psychologists.

Jennifer Hughes, Ph.D., Child, Adolescent, and Adult Outpatient Supervisor (2014, Clinical Psychology, University of California at Santa Barbara; 2016, Postdoctoral Fellowship at Louisiana State University Health Sciences Center in New Orleans, LA). Assistant Professor of Clinical Psychiatry at Louisiana State University Health Sciences Center and Assistant Professor in the Department of Psychiatry and

Behavioral Sciences at the University of Texas Health Science Center McGovern Medical School. Her research interests include the assessment and treatment of PTSD in adults, children and infants, trauma-focused interventions following traumatic injury, and vicarious trauma in healthcare providers.

Andrea LaPlante, Psy.D. (2012, Clinical Psychology, University of La Verne in La Verne, CA; 2016, Postdoctoral Fellowship at Louisiana State University Health Sciences Center in New Orleans, LA). Dr. LaPlante's clinical interests include coping with chronic illnesses, particularly HIV, and behavioral treatments for insomnia. Her research interests are primarily related to the effects of neurocognitive impairment and alcohol use on adherence to care.

Amanda M. Raines, Ph.D. (2016, Clinical Psychology, Florida State University in Tallahassee, FL; 2017, Postdoctoral Fellowship at Southeast Louisiana Veterans Health Care System in New Orleans, LA). She is a Clinical Investigator at the Southeast Louisiana Veterans Health Care System (SLVHCS). She holds an academic appointment as an Assistant Professor in the School of Medicines Department of Psychiatry at LSU. Dr. Raines' research focuses on identifying and empirically examining transdiagnostic risk and maintenance factors, as well as the development of novel interventions that can be used to treat and prevent anxiety and related pathology including suicide and substance use.

Leigh Anne Terrebonne, Ph.D., Adult Psychotherapy Supervisor (1999, Counseling Psychology, Auburn University, Auburn, Alabama). Currently in private practice in New Orleans, LA.

Arika Wadley, Psy.D. (2016, The Chicago School of Professional Psychology). She is currently an Assistant Professor/Psychologist with Louisiana State University Health Sciences Center (LSUHSC) in the Family Medicine Department. She has worked as the Director of Counseling Services at Xavier University of Louisiana and currently works as an adjunct faculty member of The Chicago School of Professional Psychology, housed on Xavier's campus. She has also worked with students in kindergarten through 8th grade at ReNEW Schools.

ADDITIONAL CONTRIBUTORS AND LECTURERS IN PSYCHOLOGY INTERNSHIP TRAINING

The psychology internship also partners with licensed psychologists, psychiatrists, social workers and other licensed professionals in the community and within the Department of Psychiatry who conduct lectures and didactics throughout the course of the year. We also welcome our alumni to join us and present as experts in their respective areas of practice following their training.

PHILOSOPHY AND AIMS OF THE PSYCHOLOGY INTERNSHIP PROGRAM

The overall aim of the psychology internship is to provide an opportunity for the psychology intern to learn and grow professionally and personally. Clinical psychology is an ever-changing and expanding field. We maintain an emphasis on empirically-supported and culturally sensitive assessment, consultation, intervention and supervision. We hope to train students who will contribute to the field of psychology and to society at large in meaningful ways. The psychology internship program is designed to be flexible enough to take into account the needs and professional goals of each trainee. At the same time, the psychology internship is committed to the goal of helping the psychology intern to develop

entry level competencies in the traditional core skills of clinical psychology such as psychodiagnostic testing, clinical interviewing, treatment planning, consultation, and psychotherapy.

VALUES AND PRINCIPLES OF THE TRAINING PROGRAM

We believe that the provision of high quality psychology internship training in clinical psychology is an important contribution to the field of psychology, mental health, and to the society at large. We feel that there is a continuing need for psychology internship training within medical schools affiliated with academic health science centers. These settings provide wonderful opportunities for professional development because psychology interns have access to contemporary theories, research, techniques and equipment. Also, faculty and staff in these settings address mental health problems and treatments from multiple perspectives, and model the multidisciplinary collaboration so necessary in the treatment of complex disorders.

We view training in psychology as a developmental process. We plan to develop competencies in the traditional core skills of clinical psychology: psychodiagnostic testing, clinical interviewing, treatment planning, consultation, psychotherapy, cultural diversity, ethics, professionalism, research and supervision. Our goal is to take the trainee with beginning psychology intern competencies, through mid-level psychology intern skills, all the way through advanced psychology intern competencies. The training is graded in complexity. We initially expose psychology interns to prototypic cases and then gradually introduce them to more complex differential diagnostic tasks and interventions with more difficult patients. Supervision is initially highly structured (involving direct observation, videotaping, and specific instructions) and gradually becomes less structured as the psychology intern becomes more skilled and capable of functioning with relative independence. Didactic seminars are also graded in complexity, and progress from basic overviews to advanced conceptualization and integration. Meaningful integration of clinical experiences, supervision, didactics, and role modeling is expected for successful completion of the psychology internship. Upon graduation from our graded sequence of training experiences, the psychology intern should be prepared to enter a postdoctoral fellowship in clinical psychology or supervised practice leading to licensure. Some interns may participate in specialty rotations sufficient to meet criteria for “specialty” postdoctoral fellowships.

We accept applicants based on our assessment of their beginning competencies, growth potential, professionalism, integrity, and goodness-of-fit. We deeply value the scientific basis of psychology. It distinguishes psychologists from other mental health disciplines. Our core psychology faculty are involved in scholarly activities such as roles in professional organizations, publishing research articles and presenting at local and national conference. We believe that the scientific values involved in multivariate approaches to prediction, psychometric foundations of test construction, probabilistic reasoning, hierarchical analysis, and healthy skepticism must guide clinical practice. We build upon these domains that were taught in graduate school by teaching psychology interns how to apply them in day-to-day clinical work.

Since our psychology internship is primarily practice-oriented, it naturally shares many of the values contained within the scholar-professional (Vail) model. The emphases of our program on integration of practice and theory, clinical skill development, learning how to become a critical consumer of scientific literature, and learning how to supervise others are all consistent with the Vail model. Our entire psychology faculty delivers direct services to patients and thus serves as professional psychologist role models to psychology interns.

Because of the cultural diversity in New Orleans, we must be sensitive to cultural factors, which may necessitate modification of diagnostic and assessment approaches. We value the “differential therapeutics” conceptualization articulated by Clarkin and Perry (1984) which highlights the importance of tailoring interventions which best suit different age, cultural, socio-economic, and diagnostic groups. We also value a life-span developmental approach to the understanding of both normal and abnormal behavior, and make a concerted effort to expose psychology interns to clinical work with children, adolescents, adults, and older adults. Our program is committed to decreasing mental health inequity in our community by offering services to all individuals who are interested in treatment. We strive to maintain an inclusive, culturally sensitive and welcoming environment for all trainees.

In summary, we emphasize the acquisition of psychodiagnostic, psychotherapy, and consultation competencies, with diverse patient populations covering the entire life span, through the modeling of these competencies by supervisors and intensive supervised experience. We prepare our psychology interns for postdoctoral training or the job market by fostering their movement towards independence in the delivery of high quality clinical services by taking into account the most recent research and clinical findings as well as changes in the mental health care delivery system.

THE PROGRAM OVERVIEW

The clinical psychology internship is a one-year, full-time (12 months) program, conducted by the Section of Psychology in the Department of Psychiatry at Louisiana State University Health Sciences Center School of Medicine. Interns apply for and are accepted into one of three tracks they complete during the training year: Adult (2 interns), Infant/Child (2 interns), or Pediatric (1 intern). Each psychology intern has a half day a week available in which to gain additional training in a "subspecialty" area such as work with trauma, school based consultation, neuropsychology with HIV populations, bariatric evaluations, and burn survivors.

Adult Track

Each Adult Track psychology intern will rotate through the adult inpatient psychiatric units (20 hours per week) located at University Medical Center for the entire training year. Inpatient rotations involve varying amounts of brief psychological assessment, group therapy, individual therapy, and consultation. Interns work within a multidisciplinary treatment team providing services in an acute inpatient hospital setting.

In addition to working on the inpatient units, adult track interns provide services at the Behavioral Sciences Center (8 hours/week). Each intern will carry four adult outpatient psychotherapy cases. Psychotherapy cases may be follow-up treatments of clients previously seen in the inpatient setting or may come from direct outpatient referrals, and may be year-long intensive treatments or serial brief therapy cases. When psychology interns want more than the required number of outpatient psychotherapy cases, the number and client mix will be based on the supervisor's approval, as well as the psychology intern's experience, interests, training needs, and available time. Interns are also required to maintain active assessment cases through the Behavioral Sciences Center and complete ten comprehensive outpatient psychological assessments with adults during the entire psychology internship year. Assessments may include psychological, neuropsychological, and psychoeducational batteries.

Infant/Child Track

Infant/Child Interns focus their training on young children (ages 0-5) as well as school aged children and adolescents. Infant/Child Track interns focus their training on young children (ages 0-5) as well as school aged children and adolescents. Their primary rotation with the Infant Team is comprised of cases referred from the Orleans Parish and St. Tammany Parish court systems who are families currently under investigation for abuse or neglect charges (20 hours per week). Interns complete assessments and psychotherapy with Infant Team cases. Infant/Child interns also participate in the Harris Infant Mental Health Program alongside the Child/Adult track interns to round out their experiences working with young children.

Infant/Child interns also carry a caseload of approximately six infant/child/adolescent outpatient psychotherapy cases and maintain ongoing assessment cases at the Behavioral Sciences Center. Interns are required to complete ten comprehensive outpatient psychological assessments with children and adolescents over the course of the internship year. Outpatient assessments may include psychological and psychoeducational batteries. Many of their referrals for psychotherapy will come from the Harris Infant Mental Health Program, which focuses on relationship-based treatment for young children in the first five years of life. By the end of the training year, interns will be able to be rostered nationally as a Child-Parent Psychotherapy provider. Infant/Child interns will carry a caseload of infant/child/adolescent outpatient psychotherapy cases at the Behavioral Sciences Center. Many of their referrals will come from the Harris Infant Mental Health Program, which focuses on relationship-based treatment for young children in the first five years of life. By the end of the training year, interns may be able to be rostered nationally as a Child-Parent Psychotherapy provider.

Pediatric Track

The Pediatric Psychology Intern position is designed for students wishing to pursue a career as a pediatric health psychologist. The intern will provide inpatient and outpatient health psychology assessment and treatment to child and adolescent patients and their families. Interns complete several rotations, gaining experience treating patients in a variety of settings: patients admitted in the hospital, patients seen in medical clinics, and outpatients seen on our psychology service. Interns gain their

experience at Children’s Hospital New Orleans, an academic medical center providing pediatric care for the gulf south.

The intern will complete two, six month rotations, which will include the following training experiences:

- One day of consult liaison work for hospital inpatients. Consults may be received from a variety of services, including hematology/oncology, physical medicine, neurology, general pediatrics, cardiology, palliative care, and endocrinology. Consults include behavioral treatment planning for medical stabilization for eating disorder patients, functional neurological disorders, chronic pain, adjustment to chronic illness, adherence concerns, coping with serious medical illness, and medical trauma. Psychology is an active participant with all medical services throughout the hospital; we receive approximately 700-800 consults per year. Supervision will be provided on a rotational basis by one of the health psychologists.
- Participation in two multidisciplinary outpatient clinics, which may include the following:
 - Nephrology clinic
 - Adolescent medicine clinic
 - Pain management clinic
 - Eating/Feeding Disorders Center
 - Diabetes Clinic
 - GI Clinic
- Interns also participate in a year long assessment clinic seeing patients referred from the hematology/oncology service for peripheral blood stem cell transplant pre or post evaluations. This clinic requires the intern to complete 8 evaluations throughout the year.
- Finally, interns follow outpatients, generally referred to the service by the inpatient consult service. Typically the intern follows 4-5 outpatients throughout the course of the year.

MAJOR TRAINING SITES/PROGRAMS

University Medical Center – Adult Inpatient Psychiatry

The inpatient psychiatry service is housed in the newly built, state of the art University Medical Center which opened in August 2015. Currently, the inpatient behavioral health service consists of four adult units with the capacity for 60 patients. LSUHSC Department of Psychiatry provides psychiatric services on three of the four adult inpatient psychiatric units. Patients age 18 and older are admitted through University Medical Center's Emergency Services. The current inpatient units consist of patients with a variety of mental health issues including mood disorders, psychotic disorders, anxiety disorders, substance use, and personality disorders. Programing for the inpatient units includes group therapies provided by various disciplines including psychology, psychiatry, social work, recreational therapy, and nursing.

Adult complete a twelve-month, 20-hour per week rotation on the psychiatric inpatient units where they are supervised by Drs. Lindsey Poe, Shane Bierma, and Danielle Cohn, who are licensed clinical psychologists and fulltime clinical faculty members at LSUHSC-NO. The psychology interns, residents in psychiatry, medical students, and nursing students rotate through these units as part of their respective

training programs. Adult and Child/Adult Track clinical psychology interns are integral members of the multidisciplinary treatment teams taking the role of consultant, diagnostician, and therapist as they provide group psychotherapy, individual psychotherapy, and psychological testing services for the units.

Behavioral Sciences Center (BSC) Outpatient Psychotherapy and Assessment Clinic

The Behavioral Sciences Center is located on the 7th floor of the LSU Healthcare Network Multi-Specialty Clinic, 478 South Johnson Street, New Orleans, in close proximity to the other major training sites. Since 2008, the Behavioral Sciences Center has become the primary outpatient clinic for the entire department and its various trainees of all disciplines. This clinic is operated by the Department of Psychiatry to provide training experience in outpatient mental health services for psychology interns, psychiatry residents, and social work interns. Referrals to the clinic come from both the public and private sectors, including private practitioners in the community, pediatric clinics at local hospitals, community mental health centers, and local schools and universities. Psychology interns from the Adult and Infant/Child tracks see patients from infancy through adulthood at the BSC where they perform intake evaluations, various types of assessment, individual psychotherapy, and couples and family therapy. Supervision is provided by the full-time faculty psychologists and by several part-time clinical faculty who are actively engaged in clinical practice in the community.

There are opportunities to provide a full range of psychotherapeutic interventions including psychodynamic psychotherapy, interpersonal therapy, play therapy, parent training, cognitive therapy, behavior therapy, and child-parent psychotherapy. Psychology Interns assigned to the BSC will carry cases for the entire year. The types of cases will be determined by the intern's supervisor and the Director of Internship Training based on the needs of the intern and the cases available.

The BSC Assessment Clinic was established in 2010 to help meet the urgent need for psychological evaluation services to the greater New Orleans area which was heavily impacted by Hurricane Katrina resulting in a decrease of available diagnostic centers and clinicians in the region. The BSC-AC provides interns with more specialized training and experience assessing patients of all ages referred for a variety of psychiatric, neurological, and behavioral issues. Psychological/cognitive issues including learning problems, ADHD, depression, anger, anxiety, and memory/cognitive disorders are routinely assessed with a customized battery which may include the WPPSI/WISC/WAIS, Woodcock-Johnson Tests of Achievement, Trail Making Test, Achenbach Scales, PAI/MMPI, and IVA+ to name a few.

A customized approach is used by the clinician, with the assistance of their clinical supervisor, based on the referral question. Services are available for individuals ages 3 to 89. Psychology interns receive supervision from a licensed clinical psychologist on the core faculty. Interns are required to carry an active assessment case at all times throughout the training year with adjustments made to their caseload depending on complexity of cases assigned (average 1-2 per month). The majority of services completed through the BSC-AC are conducted in two sessions with additional sessions scheduled as needed. Results with appropriate recommendations are provided in 60-minute feedback session appointments within a month of completion of all aspects of testing including collection of collateral reports from caregivers, teachers, etc.

Harris Infant Mental Health Program

The Infant/Child interns participate in the Harris Program, which is devoted to the study and treatment of infants and young children. The Program trains psychologists, psychiatrists, and social workers in evaluation, treatment, and intervention with infants and their families. The focus is on relationship-based assessments and treatment for infants and toddlers in the first five years of life. Trainees also learn traditional play therapy techniques, different modalities of child-parent psychotherapy, and relevant aspects of family and parenting methods needed to work with very young children and their caregivers. Infant/Child interns participate in a weekly seminar where they are taught theoretical aspects of infant development, about the parent-caregiver relationship, and evaluation and therapeutic techniques when working with this population. The seminar also incorporates the presentation of clinical evaluations and treatment, much of which is videotaped for discussion by the group. Additional components to the Harris Infant Mental Health Program include: interns will conduct outpatient therapy with referred infants and toddlers and their caregivers; interns will conduct infant observations with a normally developing, low risk infant; and interns will participate in weekly multi-disciplinary group supervision. By the end of the training year, interns will have the opportunity to be eligible to be rostered nationally as a Child-Parent Psychotherapy provider if they have met the requirements.

Infant Team

The Infant Team is contracted by the Orleans Parish and St. Tammany Parish Departments of Children and Family Services (DCFS) to complete assessments of children ages 5 years old and under in foster care with any potential caregivers of those children. The results of these assessments are reported in writing to DCFS along with recommendations regarding the best interest of the child. Included in these recommendations are any needed developmental, psychological, or psychiatric referrals and therapeutic interventions, as well as recommendations about the child's placements and changes in visitations. Generally, therapeutic services are offered to the biological parent(s) to address those issues which brought the child into foster care. Where indicated, therapy may be offered to other potential or actual caregivers to assist in promoting an emotionally supportive and beneficial relationship with the child. Most therapy is done dyadically, with the caregiver and child together. There are times when the Team recommends individual therapy for either the caregiver or the child as well. The progress of therapy is documented in quarterly reports to DCFS, who forwards these to the Orleans or St. Tammany Parish Juvenile Court. These are included in considerations by the Court with regard to decisions about reunification versus termination of parental rights and to the child's permanency plan. At times, the Infant Team primary clinician may be subpoenaed to Court as a fact or expert witness to testify in greater detail about the Team's findings. Team members also meet regularly to staff the cases with DCFS workers; various attorneys for the child, parent and DCFS; and other professionals working on the case in order to best help the child and family.

Interns are given two to three cases to follow for the year and are closely supervised. They attend staffings on Tuesdays from 8:30am - 11:00am during which the faculty and interns discuss current cases, review tapes of assessments or therapy, and come to a consensus on recommendations regarding each case. They attend monthly meetings with DCFS to staff cases and complete monthly forensic reports.

The interns take the role of primary clinician on each of their cases, working directly with the DCFS case worker assigned to the case, doing all assessments, maintaining a chart on the client(s), and producing written quarterly reports. The intern may be subpoenaed to testify as a witness. If this occurs, they are well-prepared by DCFS's attorneys and by the faculty members of the Infant Team. Should expert testimony be needed, the intern's direct supervisor would be called in to do so.

Children's Hospital New Orleans (CHNOLA)

Children's Hospital New Orleans is a nonprofit, pediatric acute children's teaching hospital with 229 pediatric beds. Over the course of the training year, the intern will acquire skills in focused assessment for health psychology, develop skills in a variety of treatment interventions, and learn to work effectively on a multidisciplinary team.

The intern will participate in a variety of training activities to prepare them for a career in pediatric health psychology. The inpatient consult/liason experience is a central experience to learning to be a health psychologist, and the intern will be able to experience this with the postdoctoral fellow at least once during the week. Consults range from brief, focused questions about how to manage a behavior (e.g., adjustment to a new medical device or diagnosis) to broader questions, such as assisting mood problems. The psychology staff covering the consult service regularly collaborates with members of the medical staff, psychiatry, social services, and other disciplines throughout the hospital. The intern also has the opportunity to participate in a variety of multidisciplinary clinics, including the Diabetes Clinic, the Dialysis Clinic, the Headache Clinic, the Feeding/Eating Disorder Clinic, the Pain Clinic, the Sickle Cell Clinic, and the Cystic Fibrosis Clinic. The intern will also see patients in the Outpatient Assessment/Treatment Clinic for either formal assessment or short-term treatment for a variety of health psychology issues.

SUPERVISION

The emphasis of the program is on the provision of quality clinical training under the supervision of LSUHSC-NO faculty. A major strength of our training program, based on feedback from graduates who are currently in practice, is the quantity and quality of supervision provided for each psychology intern. Each psychology intern receives an average of 4-6 hours of supervision per week. Two hours are dedicated to individual supervision while the other 2-4 hours are generally in group supervision format. Occasionally, interns receive an additional hour of individual supervision if needed. We encourage psychology interns to experience supervision with supervisors of different theoretical orientations. It is expected that psychology interns will require the most directive supervision during the first third of a given rotation, somewhat less during the middle, and that they will function more independently towards the end of a rotation. Thus, while supervision is provided throughout the year, the amount of structure is dependent on the psychology intern's capabilities and needs. If it is found that psychology interns require remedial training in a particular clinical area, they will have more supervised experience in that area until they can more competently perform that role. Videotaping and direct observation of

interns providing services is used in all settings to facilitate supervision throughout the year. Equipment for taping is available for interns' use.

COMMUTING

Training sites are located throughout the New Orleans area. Please note that psychology interns must commute to and from various training sites, and that several sites are not accessible through public transportation. Interns are expected to have reliable transportation to all sites.

REQUIRED DIDACTIC SEMINARS AND GROUP SUPERVISION

Internship Meeting with Training Director

Wednesdays from 8:30 – 9:00 am (CALS 6233)

This meeting provides an opportunity for the psychology interns to connect with one another and check in with the Training Director and Associate Training Director through group discussions with particular attention paid to professional development issues as well as time to discuss programmatic issues, problems, or general concerns about the psychology internship experience.

Group Supervision of Supervision (GSoS)

Wednesdays from 9:00 – 10:00 am (CALS 6233)

GSoS is led by Dr. Sandy Hyatt, clinical faculty, with co-facilitation provided by postdoctoral fellow, Dr. Katie Catanzarite. The GSoS experience at LSUHSC was developed by Erika Rajo, PsyD in 2019 to help trainees enhance their knowledge of clinical supervision theory and turn this into effective clinical practice. This training opportunity has continued to evolve over the past several years to help psychology interns and postdoctoral fellows achieve competency in clinical supervision. As part of the training experience, each intern will be paired with a practicum student and/or psychiatry resident, for whom they will provide psychotherapy and/or assessment supervision for the duration of the training year. Intern supervisors meet with their supervisees on a weekly basis and bring material from these meetings into GSoS so that GSoS supervisors and fellow interns are able to help develop their supervision skills, knowledge, and attitudes. Similar to other clinical activities as an intern (i.e., individual supervision, group psychotherapy), GSoS facilitators are evaluating you in order to provide feedback and strengthen your skills. This process is intentional. We want to model the evaluative process that you (by virtue of being supervisors) will also be doing with your own supervisees. We strive to create a space where we help one another become the best clinical supervisors we can be. We will support one another, discuss our supervision cases, read the literature, role play, and much more.

Psychotherapy Group Supervision

Wednesdays from 10:15 – 11:15 am (CALS 6233)

This unique, year-long supervision, led by Drs. Dani Archie and Michelle Moore, involves presentations of therapy cases seen at the various training settings. Psychology interns formally present cases which are then discussed as a group. The focus of the discussion is on deepening case conceptualization, understanding the cultural formulation of the case, discussing transference and countertransference that may arise in the treatment, and brainstorming other potential therapeutic techniques that could be

beneficial to the individual case. Interns are welcome to bring videos from session to enhance discussion about psychotherapy cases.

Assessment Group Supervision

Wednesdays from 12:30 - 2:30pm (CAL 6233)

This weekly group supervision, also known as “Assessment Clinic” and led by Drs. Shane Bierma and Chanelle Batiste, allows all interns to formally present assessment cases of infants, children, adolescents, and adults evaluated through the outpatient clinics. Fundamentals of psychological assessment including test administration, selection of testing instruments, collection of collateral reports, integration of testing data, report writing, recommendations for feedback sessions, etc. will be discussed throughout the year. Interns are required to carry an active assessment case at all times throughout the training year with adjustments made to their caseload depending on complexity of cases assigned (average 1-2 per month). In order to stay on track to complete the required assessments, it is recommended that interns not wait to finish an assessment case before starting the next one. Interns are expected to complete at least half of their required assessment cases, including feedback sessions, by the end of December. Additionally, in order for supervisors to edit reports in time for interns to complete all of their assessment feedback sessions, all testing sessions must be complete by the end of May.

Psychology Seminar

Wednesdays from 2:45 – 4:00 pm (CAL 6233)

This weekly seminar, coordinated by Dr. Danielle Cohn, consists of various special topics in clinical psychology, ethical decision-making, and professional development as a psychologist. Multidisciplinary core faculty and outside lecturers from the community (e.g. psychologists, psychiatrists, and other disciplines) discuss a variety of issues including supervision, licensure preparation, cultural diversity, psychopharmacology, unique specialty populations, and theoretical models. Additional topics are welcomed by the request of the current intern class. In addition, each psychology intern is required to make a formal presentation on a topic of the intern’s choice. Although Psychology Seminar typically takes place in person, it is conducted via Zoom on occasion with lecturers from outside New Orleans.

Harris Infant Mental Health Seminar and Supervision

Tuesdays 12:30-3:30 (CAL 6233)

Infant/Child Track Only

The Harris Program is devoted to the study and treatment of infants and young children. The infant/child and child/adult interns participate in the Harris Program. The Harris Program trains psychologists, psychiatrists, and social workers in evaluation, treatment, and intervention with infants and their families. The focus is on relationship-based assessments and treatment for infants and toddlers in the first five years of life. Trainees also learn traditional play therapy techniques, different modalities of child-parent psychotherapy, and relevant aspects of family and parenting methods needed to work with very young children and their caregivers. One of the primary teaching components in the Harris Infant Mental Health training program is the weekly didactic seminar from 12:30-2:00pm. The didactic seminar is taught by core Harris faculty who speak on a variety of topics relevant to infant mental health. The fellowship year begins with seminars providing a comprehensive overview of Attachment Theory, infant observation, and assessment techniques. It then addresses various treatment modalities utilized when working with young children and then expands into specialized topics regarding this population, i.e. feeding disorders, infants exposed to violence, etc. Group supervision of young child cases and discussion of interns’ and fellows’ observations of normally developing babies meets after the Harris seminars on Tuesdays from 2:00-3:30pm.

Child and Adolescent Treatment Team (ChATT)

Third Thursday of each Month from 12:00 – 12:45pm (BSC Conference Room, 7th Floor)

Infant/Child interns only

Infant/Child interns will meet with psychiatry faculty and fellows for a monthly treatment team meeting to discuss challenging cases, provide consultation to respective disciplines, and collaborate on shared cases at the BSC.

Collaborative Social Justice Book Club

Bimonthly on the second Tuesday of each month from 10:45 am – 12:15 pm

The intent of the book club is to bring together interns from two internship programs (LSUHSC and University of New Mexico Health Sciences Center) who are serving different regional populations to discuss their reflections and responses to a shared book on a social justice related topic. Faculty aid in facilitating conversation and providing a framework for the interns.

Community Mentor

One hour monthly meeting at time determined by intern and mentor

Each intern will be assigned a mentor from the gratis faculty to meet with monthly throughout the training year. Mentors are psychologists with a variety of expertise who work in various throughout the New Orleans community. Mentors serve as a source of support and guidance on professional development.

OTHER EDUCATIONAL OPPORTUNITIES

- During orientation, all interns complete a two-day training for the Autism Diagnostic Observation Schedule-Second (ADOS-2) with Dr. Kristin Callahan. ADOS administration can be completed at the LSU Behavioral Sciences Center or Algiers Behavioral Health Center and incorporated into assessments when indicated.
- While on the primary rotations, psychology interns will be required to attend in-service and other training activities, which are germane to their functioning as members of the multidisciplinary team.
- **Committee on Diversity Equity Inclusion and Belonging (CDEIB):** This committee brings together the Sections of Psychology and Social Work to learn from one another, change and improve our systems to reflect our values and commitment to social justice and advocate for change and reform where needed. The committee meets monthly and also hosts a book club called Grub and Grow which occurs monthly on Thursday afternoons. For more information, contact Drs. Sandy Hyatt and Nathan Brown.
- **Psychiatry Grand Rounds** are held at 1542 Tulane Ave. in the first floor auditorium from 1:00-2:00 pm, usually three Thursdays each month. Local, national, and international experts give presentations on diagnostic and treatment issues, biological psychiatry, epidemiological findings, socio-political issues, theoretical developments, and philosophical issues in clinical psychiatry. Interns are welcome to attend if their schedule allows.

- **New Orleans-Birmingham Psychoanalytic Center (NOBPC):** Psychology interns have an open invitation to attend lectures offered by NOBPC, a well-established training program for mental health professionals interested in psychoanalysis. The Institute also offers a mentorship program each year which interns are welcome to participate in during the year. For more information, contact Drs. Billy Walker or Stephen Anen.
- **Crescent City Area Psychological Society (CCAPS):** A local group of psychologists who meet monthly for lectures and socializing. Interns are welcome to attend any meetings offered. Dr. Moore will share updates from the group throughout the year about events.
- New Orleans is a popular city for continuing education programs and conventions. Depending on the training year, interns may have an opportunity to present at a conference and/or attend sessions.
- **Louisiana Psychological Association (LPA):** The LPA holds a workshop in the Fall psychologists as well as hosting an annual conference in the summer. Psychology interns are usually charged a reduced fee and funding to attend the conferences is often also available through the Section of Psychology. For more information, contact Dr. Nathan Brown who is currently serving on the Executive Council.
- Throughout the year, various activities and workshops in the School of Medicine may be applicable to psychology interns which they are also invited to attend if their schedule allows.
- **Working with Latinx Patients: A Consultation Group:** This bi-weekly consultation group is intended for individuals who are doing psychotherapy or testing with Spanish-speaking patients or their families. We stay up-to-date on the literature and discuss as a group the cultural/ethnic factors that arise in working with this population (e.g., Bilingualism; Values; Immigration; Countertransference; Evidence-based practices with Latinx patients; etc.). This group is held in English, and all are welcome regardless of ethnicity or language ability. For more information, contact Drs. Nathan Brown or Sebastian Del-Corral-Winder.

SPECIALTY ROTATION EXPERIENCES

Infant/Child and Adult Track interns will spend 4 hours/week on two 6-month long specialty rotations.

University Hospital Inpatient Trauma Psychology (Supervisor: Dr. Sandy Hyatt)

The Spirit of Charity Trauma Center at University Medical Center, New Orleans (UMCNO) is the only Level 1 trauma center in Southeast Louisiana. It is also one of the busiest trauma centers in the country and a national leader in trauma related research, teaching, prevention, and outpatient care programs. Located adjacent to the LSUHSC main downtown campus, the Trauma Center provides multidisciplinary treatment to patients with acute traumatic injuries such as motor vehicle accidents, gunshot wounds, and other accidental or violent injuries. The Trauma Psychology team in the Trauma Center is made up of Dr. Erika Rajo, Dr. Sandy Hyatt, and psychiatry and psychology trainees. The team provides psychological screening for PTSD and depression for all traumatic injury patients, screening and brief

intervention (SBI) for patients with elevated blood alcohol levels, and consultation and brief interventions to inpatients who have psychological problems during their treatment and recovery at UMCNO. Issues typically include acute stress disorder, posttraumatic stress disorder, depression, anxiety, adjustment disorders, and other mental illness. The psychology team works closely with the inpatient psychiatry team and the trauma and orthopedic surgeons to provide comprehensive patient care.

As part of the Spirit of Charity Psychiatry Research Unit, the trauma psychology team also participates in research initiatives including prevention and treatment of posttraumatic stress disorder and other psychological sequelae following traumatic injury, virtual reality exposure therapy for gunshot victims, and violence prevention programs.

Supervised by Dr. Sandy Hyatt, psychology interns will have the opportunity to provide psychological screenings, brief interventions, and individual and family psychotherapy treatment for inpatients at the Trauma Center. Interns are also welcome to participate in the numerous research projects through the Spirit of Charity Psychiatry Research Unit. For more information about UMC and the Trauma Center visit <http://www.umcno.org/>.

University Hospital Burn Center *(Supervisor: Dr. Nathan Brown)*

The psychology clinic at the Burn Center at University Medical Center, New Orleans is a specialty service under the umbrella of the UMCNO Trauma Psychology team. Our Burn Center, we are proud to report, is the Gulf South's only Burn Center verified by the American Burn Association. In brief, that means that we provide a high standard of care to individuals with serious burn injuries. The Burn Psychology team is currently comprised of Dr. Nathan Brown (Burn rotation supervisor), LSUHSC faculty psychologist, though he collaborates closely with the Trauma Center mental health providers as well as the multidisciplinary burn team (i.e., burn surgeons, nurses, physical therapists, occupational therapists, pharmacists, speech therapists, dieticians, and more). This rotation shares some similarities with the trauma rotation; for example, we provide inpatient psychological screening and short-term interventions for our hospitalized patients. However, the experience will differ from the trauma rotation because, in contrast to the Trauma Center, the Burn Center is contained in a relatively small 16-bed unit and patients are often hospitalized for up to several months. Therefore, interns will have the opportunity to work with a consistent team of burn staff and to follow patients on an inpatient basis for a relatively longer period of time. In sum, psychology interns will have the opportunity to provide psychological screenings, brief interventions, and individual and family psychotherapy treatment for inpatients at the Trauma Center. Depending on availability and interest, interns may also participate in the Burn Center's weekly multidisciplinary team meetings, monthly educational conference, burn research projects, biweekly Burn Survivor Support Group, and observe burn surgeries. For more information about UMC and the Burn Center visit <https://www.umcno.org/programs-services/burn-center/>

School-Based Consultation/Intervention *(Supervisor: Dr. Michelle Moore)*

Since 2006, Louisiana State University Health Sciences Center Department of Psychiatry (LSUHSC) has worked collaboratively to meet the psychosocial and educational needs of students and families in various schools in and around the New Orleans area. The purpose of the school rotation for psychology interns is to improve the interns understanding of the role a clinical psychologist plays in a school setting. More specifically, the intern learns how to provide effective consultation services to school administrators and teachers regarding challenging students at school and managing difficult behaviors. Interns will also learn about techniques and treatment styles that are different in a school setting from an outpatient setting. Interns will conduct classroom observations, create functional behavior assessments and behavior intervention plans. Clinical psychologists do not always get to experience a child population in a school setting whereas trainees who are seeking specialization in school psychology will be well versed in this aspect of training. It is important for clinical psychology trainees to gain experience working with children in a school setting because children spend most of their day at school. The relationships children build with peers and teachers are important aspects of their development.

Opportunities Academy *(Supervisor: Dr. Kristin Callahan)*

Opportunities Academy (OA) is a rigorous, post-secondary full day program for scholars with neuro-developmental disabilities aged 17-22. During this rotation, interns will have the opportunity to be an integrated member of the school's mental health team, participating as a member of the IEP team. They will have the opportunity to complete integrated Louisiana Bulletin 1508 compliant psycho-educational evaluations in conjunction with related services providers and will have the opportunity to conduct Functional Behavior Assessments and create Behavior Intervention Plans for scholars with a variety of intervention needs in conjunction with teachers and job coaches. Opportunities are also available to provide individual and group therapy, social skill trainings, and provide professional development trainings on topics related to mental health to OA program teachers and staff. Dr. Kristin Callahan provides supervision during this rotation.

CrescentCare *(Supervisor: Dr. Andrea LaPlante)*

CrescentCare is a Federally Qualified Health Center specializing in the care of people living with HIV and members of the LGBTQ community. CrescentCare provides integrated care, including primary medical services, behavioral health, and preventative services, regardless of income or insurance status. Interns will provide individual therapy services within the Behavioral Health Department for people living with HIV. Patients present with a wide range of psychological conditions, including severe mood disorders, PTSD, and substance abuse. The intern will work as part of a multidisciplinary team and under the supervision of Dr. Andrea LaPlante.

University Hospital Bariatric Clinic *(Supervisor: Dr. Lindsey Poe)*

The Center for Weight Loss and Bariatric Surgery is a clinic within University Medical Center providing vertical sleeve gastrectomy and Roux-en-y bypass surgery to the morbidly obese. During this rotation, interns will have the opportunity to learn about and conduct psychological evaluations required for clearance for bariatric surgery. Interns will additionally have the opportunity to provide screening and brief interventions, manualized treatment for binge eating disorder, and post-operative health and

behavior assessments. The bariatric behavioral health team works closely with social work, nursing, dietitians, and bariatric surgeons on a multidisciplinary team to ensure optimal weight loss success and improvement in quality of life. This rotation is supervised by Dr. Poe.

HIV Outpatient Clinic at University Medical Center (*Supervisor: Dr. Shane Bierma*)

An intern's role at the HOP Clinic is primarily conducting neuropsychological assessments and 1-2 sessions of individual psychotherapy with patients diagnosed with HIV and hepatitis. Referrals come from other providers within the clinic. For assessments, referrals are typically added to the intern's schedule at the request of other providers who are looking to quickly seek information about patients' suitability for simulant medications or questioning changes in cognitive status as a result of a neurodegenerative process. Intakes and assessments are conducted within a single visit so results can be provided to the referral source prior to patients' next visit with them, which is often within the next 14 days. This rotation is under the supervision of Dr. Shane Bierma.

*** Note: Rotations are subject to change each year. Additional experiences may be available depending on individual intern's expressed interest and/or availability of appropriate faculty. Prior approval from training director is required before beginning any additional experience.**

APPLICATION PROCEDURES

Our program uses the APPIC uniform application for Psychology Internship, which is the AAPI Online. Specific information about the AAPI can be found on APPIC's website at <http://www.appic.org>. In addition to the AAPI, interested applicants need to also submit the following supplemental materials including: a cover letter that states which track you are applying for (i.e., Infant/Child track, Child/Adult track, or Adult track), curriculum vita, de-identified treatment summary (please limit to 3 pages), and de-identified sample psychological assessment. The treatment summary should include the following: presenting problem, demographic information, relevant history, diagnoses, theoretical case conceptualization, treatment plan and course of treatment (how therapy progressed and ended). All applications must be received no later than November 1st. For additional questions regarding the aforementioned application materials please feel free to contact our program. We welcome telephone calls or e-mails to the Training Director, Associate Training Director, Administrative Assistant and/or other psychology faculty in order to clarify issues related to the program or the application procedure.

Physical Address to contact Dr. Archie, Dr. Cohn, and/or Ms. Olivarez directly:

Louisiana State University Health Sciences Center, School of Medicine
Department of Psychiatry, Section of Psychology c/o Dani Archie, PhD.
1542 Tulane Avenue, 2nd Floor
New Orleans, LA 70112

Dani Archie, Ph.D., Training Director
Phone: 504-568-2537; Email: darch1@lsuhsc.edu

Danielle Cohn, Ph.D., Associate Training Director
Phone 504-568-2537; Email: dcohn1@lsuhsc.edu

Jennifer Olivarez, Program Coordinator
Phone: 504-568-2537; Email: joliv8@lsuhsc.edu

****IMPORTANT NOTE** All interviews will be conducted via Zoom teleconferencing.**

SELECTION PROCEDURES

The Training Director reviews all applications for basic eligibility, which includes a graduate student in good standing from a clinical or clinical combined APA accredited program. In addition, applicants should have completed their qualifying exams and have received approval for their dissertation proposal. Applicants who do not meet these requirements and those who will not be receiving a formal interview will be notified immediately. The Training Director reviews all applications for basic eligibility, which includes a graduate student in good standing from a clinical or clinical combined APA accredited program. In addition, applicants should have completed their qualifying exams and have received approval for their dissertation proposal. Applicants who do not meet these requirements and those who will not be receiving a formal interview will be notified immediately. Applications and supporting materials are reviewed by Dr. Archie as well as members of the Clinical Psychology Internship Committee. Reviewers make quantitative and qualitative ratings of the applicant's suitability for the program and our ability to meet the applicant's training needs. The applicants are then ranked in terms of goodness of fit. The top ranked applicants will be contacted to schedule interviews over Zoom. All other applicants will be notified prior to December 15th if you will not be offered an interview with the program. During the interview, we will ask permission to photograph interviewees. Given the large number of interviewees, we find that a photograph, along with notes we make during the interview process, helps to keep clear who we are discussing when final ranking decisions are made. Should an applicant decline to be photographed, it will have no negative impact on their ranking. Once invited to interview, applicants can expect to meet with 3 to 4 faculty members individually, participate in a group interview, and have a group Q&A session with our current interns. The Clinical Psychology Internship Committee meets following the interview process to determine the rank order list of applicants.

Note: LSUHSC NO participates in APPIC's computerized matching process. If you have any questions regarding the matching process, please refer to <http://www.appic.org/Match/Match-Policies>.

This internship site agrees to abide by the APPIC Policy that no person at this training facility will solicit, accept, or use any ranking related information from any intern applicant prior to Uniform

Notification/Match Day. In addition, the LSU Health Sciences Center School of Medicine Department of Psychiatry, Section of Psychology will follow the attached rules and guidelines of APPIC. Additionally, should the applicant have complaints about the LSUHSC internship or internship process, the applicant can call the Education Directorate of the American Psychological Association at [202-336-5979](tel:202-336-5979).

It is the policy of the Louisiana State University Health Sciences Center (LSUHSC) New Orleans campus and the Medical Center of Louisiana at New Orleans (MCLNO) to promote and safeguard the workplace from consequences of substance abuse. All post job offer applicants are REQUIRED to undergo and pass post job offer substance abuse testing prior to beginning employment. They must test free of drugs as a condition of hiring. A negative test result must be received by LSUHSC and MCLNO before you can attend orientation and begin work. You have the right to refuse to have the alcohol and/or drug test done. Post job offer applicants who refuse to submit to a drug test will no longer be eligible to begin the internship. Random drug/alcohol testing and testing due to behavior suggestive of drug/alcohol use during work are possible.

Equal Opportunity/Affirmative Action (Statement of the LSUHSC Chancellor)

The Louisiana State University Health Sciences Center recognizes its legal and moral obligations to guarantee equal employment opportunity to all persons in all segments of University life. We also recognize the historical denial of equal opportunity to certain segments of our population. We are, therefore, committed to providing equal opportunity at the Health Sciences Center to fulfill our legal and moral obligations.

It is with a genuine concern for all the people that we publicly express our commitment to equal employment opportunity and affirmative action. This commitment includes not only providing equity in our present employment practices, but also a commitment to the removal of past barriers that hinder equal employment opportunities.

The Health Sciences Center is committed to this policy because it is our belief that it is morally right, it is good personnel management, and it is legally required by Title VII of the Civil Rights Act of 1964, as amended, by Equal Employment Opportunity Act of 1972, Executive Order Number 11246, the Rehabilitation Act of 1973, as amended, Title IX of the Education Amendments of 1972, the Vietnam Era Veterans Readjustment Assistance Act or 1974, Governor Edwin Edwards' Executive Order Number 13, and Louisiana Fair Employment Practices Act.

Louisiana State University Health Sciences Center will take affirmative action to insure that the following will be implemented at all levels of administration:

1. Base employment decisions so as to further the principles of equal employment opportunity;
2. Ensure that all personnel actions, such as, compensation, tenure, benefits, transfers, layoffs, recall from layoffs, education, tuition assistance, social and recreation programs be administered without regard to race, color, religion, sex, age, national origin, handicap/veteran status, or any other non-merit factor.

Basic guidelines and methods of achieving the goal of equal employment opportunity will be set forth in Louisiana State University Health Sciences Center's Affirmative Action Program.

Overall responsibility for the reaffirmation of policy and program is the responsibility of the Chancellor's Office.

Implementation of the program coordination and monitoring to ensure compliance is the responsibility of the Department of Human Resource Management.

Any persons having questions regarding this program should contact the Director of Human Resource Management or the Labor Relations Manager (504-568-8742).

Therefore, in keeping with application of federal and state laws and regulation, we at the Louisiana State University Health Sciences Center commit ourselves to this Affirmative Action Plan that is designed to demonstrate our good faith to successfully achieve, for academic and non-academic staff, the goal of equal employment opportunity.

DUE PROCESS PROCEDURES

Due process ensures that decisions made by programs about interns are not arbitrary or personally based, requires that programs identify specific evaluative procedures which are applied to all trainees, and have appropriate appeal procedures available to the intern so they may challenge the program's action. General due process guidelines include:

- presenting interns in writing with the program's expectations related to professional functioning, which is outlined in the Supervisor's Evaluation of Intern's Profession-Wide Competencies;
- stipulating the procedures for evaluations, including when and how evaluations will be conducted, which occur quarterly between the intern and supervisor(s) as well as with the input from the Clinical Psychology Internship Committee to ensure consistent, stable progress;
- articulating the various procedures and actions involved in making decisions regarding problems;
- communicating with graduate programs about any suspected difficulties with interns and seeking input from these academic programs about how to address such difficulties;
- instituting, with input and knowledge from the graduate program, a remediation plan for identified inadequacies, including a time frame for expected remediation and consequences of not rectifying the inadequacies;
- providing a written procedure to the intern, which describes how the intern may appeal the program's action;
- ensuring that interns have sufficient time to respond to any action taken by the program;
- using input from multiple professional sources when making decisions or recommendations regarding the intern's performance; and
- documenting, in writing and to all relevant parties, the action taken by the program and its rationale.

Definition of Problematic Behavior

For purposes of this document, intern problematic behavior is defined broadly as an interference in professional functioning that is reflected in one or more of the following ways:

1. An inability and/or unwillingness to acquire and integrate professional standards into one's repertoire of professional behavior.
2. An inability to acquire professional skills in order to reach an acceptable level of competency.
3. An inability to control personal and interpersonal stress, psychological difficulties, substance abuse, and/or excessive emotional reactions that interfere with professional functioning.

While it is a professional judgment as to when an intern's behavior reaches the level of "problematic behavior" rather than just an area of "concern," for purposes of this document a concern refers to an intern's behaviors, attitudes, or characteristics that, while of concern, do not rise to the level of requiring remediation and are perceived not to be excessive nor as an impediment for reaching competency levels for professionals in training. An intern is typically defined as having a "problematic behavior" if displaying one or more of the following characteristics:

1. The intern does not acknowledge, understand, or address the problem when it is identified.
2. The problem reflects a skill deficit that may or may not be rectified by academic or didactic training.
3. The quality of services delivered by the intern is sufficiently negatively affected by the problematic behavior.
4. A disproportionate amount of attention by training personnel is required in terms of level of training to address the problematic behavior.
5. The trainee's behavior does not change as a function of feedback, remediation efforts, and/or time.
6. The problematic behavior has potential for ethical or legal ramifications if not addressed or is illegal.
7. The intern's behavior negatively impacts the public view of the agency.
8. The problematic behavior negatively impacts the intern class.

Procedures for responding to an intern's initial problematic behavior

There are four instances where these procedures could be initiated:

1. After the 1st quarter, if an intern receives a rating of 1 or Not Assessed on a profession-wide competency domain at the quarterly supervisors meeting.
2. During the mid-year evaluation, interns are expected to achieve 80% or more of their ratings at the intermediate skill level or above. At least 27 of the 34 competency areas should be rated at the Intern Practice Level or above. If the intern's performance falls below this expectation, then due process should be initiated.
3. After the 3rd quarter, if an intern fails to meet the goals outlined by the Clinical Psychology Internship Committee (CPIC) resulting in performance at a rating of 2, 1 or Not Assessed at the quarterly supervisors meeting.

4. At any point during the training year if an intern's behavior rises to a level of concern that is considered to be severe or a potential harm to the public, then due process should be initiated.

The procedures are as follows:

1. Following the quarterly meeting, the intern's supervisor(s) will meet with the Training Director (TD) or Associate Training Director (ATD) either in person or virtually to discuss the rating and determine what action needs to be taken to address the issues reflected by the rating.
2. During the quarterly meeting between the intern and the TD/ATD, the intern will be notified and receive written documentation that these concerns are present. The intern has an opportunity to provide a statement related to their response to the rating.
3. In discussing the rating and the intern's response (if available), the TD and the intern's supervisor(s) shall adopt one of the following decisions:
 - a. **Level 1:** The problem does not warrant a written plan. The problematic behavior will be addressed monthly through communication between the intern and their supervisor(s) which is shared with the TD but will not be sent to the Director of Clinical Training (DCT) of the intern's graduate program. The intern is formally reassessed at the next quarterly evaluation meeting.
 - b. **Level 2:** A remediation plan is created with a written statement including the elements outlined below. The written statement will be reviewed with the intern, supervisors, and TD; signed by all participating parties; and then emailed to the DCT of the intern's graduate program.
 - i. Description of the actual behaviors associated with the inadequate rating;
 - ii. Rationale for the decision made by the program;
 - iii. Specific recommendations for rectifying the problem;
 - iv. Time frame for the remediation plan during which the problem is expected to be ameliorated; and
 - v. Procedures designed to ascertain whether the problem has been appropriately rectified.
 - c. **Level 3:** Probation is warranted due to the severity of concerns and/or risk to the public. A remediation plan is developed as a written statement including the elements outlined below. The written statement will be reviewed with the intern, supervisors and TD; signed by all participating parties; and then emailed to the DCT of the intern's graduate program.
 - i. Description of the actual behaviors associated with the inadequate rating;
 - ii. Rationale for the decision made by the program;
 - iii. Specific recommendations for rectifying the problem;
 - iv. Time frame for the probation period during which the problem is expected to be ameliorated; and
 - v. Procedures designed to ascertain whether the problem has been appropriately rectified.

4. The TD will meet with the intern to review the action taken. The intern may choose to accept the decision or may choose to challenge the action. If the intern's problematic behavior is considered to be at a Level 1, then no challenge is available due to the informal nature of the plan to improve the aforementioned problem. The procedures for challenging the action are presented in the grievance procedures outlined later in this document under the situation involving "intern challenge".

5. When the decision falls at a Level 2 or Level 3 and a written statement is developed, the intern will participate in a meeting with the TD and appropriate supervisor(s) at the conclusion of the time period specified in the remediation plan. Prior to this meeting, the faculty will determine if the intern has successfully remediated the aforementioned problem. If the problematic behavior has been remediated based on the professional opinions of the faculty, then the intern, DCT and other appropriate individuals will be informed, and no further action will be taken. If the intern fails to remediate the problem within the time frame of the remediation plan or probationary period, then the procedures for responding to continuation of problematic behavior shall be initiated as outlined below.

Remediation Considerations

It is important to have meaningful ways to address a problem once it has been identified to ensure that the intern's success in achieving entry level competency upon completion of the internship is paramount in the procedures and decisions made. Several possible, and perhaps concurrent, courses of action designed to remediate problems include but are not limited to:

1. Increasing supervision, either with the same and/or other supervisors;
2. Changes in the format, emphasis, and/or focus of supervision;
3. Recommending personal therapy in a way that all parties involved have clarified the manner in which therapy contacts will be used in the intern evaluation process;
4. Reducing the intern's clinical or other workload for a specified time frame;
5. Requiring specific didactic trainings, review of literature, or other academic coursework to address the area of problematic behavior; and/or
6. Recommending, when appropriate, a leave of absence and/or a second internship.

Procedures for responding to continuation of problematic behavior

If the intern's supervisor(s) and the TD determine that, after a reasonable time period outlined in the remediation plan, the remediation efforts do not: 1.) rectify the problem, or 2.) when the intern seems unable or unwilling to alter their behavior, or 3.) when mistakes/behaviors are severe or 4.) if these behaviors/mistakes would be unable to be resolved in a reasonable time period given the time remaining in the internship program, then the training program may need to take more formal action. The TD shall communicate, in writing, to the intern that the problematic behavior has not been adequately resolved and explain the rationale for this decision. The TD shall provide the intern with the decision regarding which action will be taken. The potential action(s) taken by the faculty and TD at this stage of the due process procedure are listed below:

ACTION 1: Development of a new remediation plan under a probationary period with a specific time frame, which shall include the specific elements outlined earlier in this document;

ACTION 2: Suspension whereby the intern is not allowed to continue engaging in certain professional activities until there is evidence that the behavior in question has improved;

ACTION 3: Providing the intern with a limited endorsement at the completion of internship, including the specification of those settings, populations, and/or services in which the intern is competent and those in which the intern has not achieved full competency to practice independently;

ACTION 4: Communication which informs the intern that the TD and the intern's supervisor(s) are recommending to the Section Chief and Chairman that the intern shall not successfully complete the internship, if the behavior does not change within a specified time frame;

ACTION 5: Communicating to the intern and DCT that the intern has not successfully completed the internship, but is allowed to continue their training at the culmination of the internship year as an unpaid practicum placement for a specified amount of time;

ACTION 6: Communication which informs the intern that the TD and the intern's supervisor(s) are recommending to the Section Chief and Chairman that the intern shall be terminated immediately from the internship program.

Within 5 business days of receipt of the decision regarding the action, the intern shall respond, in writing, to the action by either accepting the action or challenging the action. If the intern challenges the action, the grievance procedures regarding an intern challenge shall be followed.

GRIEVANCE PROCEDURES

There are two situations in which grievance procedures can be initiated, either due to an intern challenge or from an intern complaint. Each of these situations, and the course of action accompanying them, are described below.

1. **Intern Challenge:** When the intern challenges the action taken by the faculty during the due process procedures.
2. **Intern Complaint:** When the intern would like to file a complaint against a supervisor, staff member, other trainee, or the program itself and wishes to file a formal grievance.

Intern Challenge

If the intern challenges the decision and action taken by the faculty as described in the due process procedures, then the following procedures shall be followed:

1. Within 5 business days of receipt of the decision, the intern shall inform the TD, in writing, of such a challenge.
2. Upon receipt of this challenge, the TD shall convene the Clinical Psychology Internship Committee (CPIC) to review the written statement from the intern regarding their rationale for the challenge. The CPIC shall convene within 5 business days after receiving notice from the TD.
3. At the CPIC meeting convened by the TD, the TD shall provide the committee with documentation regarding the initial decision, level of perceived problematic behavior, any

written statements available from the TD or direct supervisor(s), and the written statement from the intern regarding the challenge being made. The intern retains the right to be present at the meeting and to hear all evidence presented with the opportunity to dispute or explain their behavior.

4. At the conclusion of the meeting, the committee shall convene without the intern present and vote on whether to uphold the decision of the TD or to uphold the challenge by the intern. The majority vote will determine the final decision of the committee. If the vote ends in a tie with no clear majority, then the decision and supporting documents shall be submitted to the Chairman for a final decision.

- a. If the committee upholds the decision of the TD, then the remediation plan is put into action and an appropriate time frame is developed to remediate the intern's problematic behavior.
- b. If the committee upholds the intern's challenge, then no further action is taken for remediation and the DCT is notified of the decision.

5. Within 5 business days, the intern is informed, in writing, of the recommendations and decision made by the committee. The intern can either accept or reject the recommendations. If the intern rejects the recommendations and decision, the CPIC written statement shall be submitted to the Chairman of the Department of Psychiatry.

6. Within 10 business days of receipt of the written statement from the committee as well as supporting documentation from the TD inclusive of the intern's written statement, the Chairman shall do one of the following:

- a. Accept the committee's decision,
- b. Reject the committee's decision and provide an alternative action;
- c. Request further documentation from the intern, supervisors, TD or CPIC, which shall be provided within 5 business days of the request before making a final decision to accept or reject the committee's decision.

Once a decision has been made by the Chairman, the intern, TD, CPIC, DCT and other appropriate individuals are informed in writing of the action taken, and the decision is final.

Intern Complaint

If there is a situation in which the intern has a complaint or grievance against a supervisor, faculty, TD, staff member, other trainee, or the program itself and wishes to file a formal grievance, then the following procedures shall be followed:

1. Discuss the grievance directly with the supervisor, faculty, TD, staff member, other trainee, or TD in an effort to informally resolve the problem.
2. If the matter cannot be resolved through informal resolution, or it is inappropriate to raise with the other individual, then the grievance shall be discussed with the TD.
3. If the TD cannot resolve the matter, the TD will choose a faculty member who will attempt to mediate the matter. Written material will be sought from both parties involved documenting their awareness of the grievance and statement regarding the grievance.

4. If the TD is the object of the grievance, or unavailable, the grievance shall be discussed directly with the Section Chief for Psychology.
5. If mediation fails, the TD will convene a review panel (except for complaints against staff members where the grievance procedures for that person's discipline will be followed) consisting of the TD, the Section Chief, and one faculty member.
 - a. If the grievance is against the TD, then the TD will not serve on this committee and the Section Chief shall choose the other two faculty members for the review panel.
6. The Review Panel will review all written materials (from the intern, other party, mediation) and have an opportunity at its discretion to interview the parties or other individuals with relevant information. The Review Panel has final discretion regarding outcome, and the outcome is based on majority vote.

These due process procedures and grievance procedures set forth in the internship handbook are intended to provide the psychology intern with a means to resolve perceived conflicts that cannot be resolved by informal means. The program will not retaliate against an intern for a grievance made in good faith. Nothing here precludes attempted resolution of difficulties by adjudication at a school or university level following the guidelines of the Human Resources department at <https://www.lsuhs.edu/administration/hrm/>. If the intern disagrees with how the program has handled a situation, they have the option to contact the Office of the Student Ombudsman at (504) 568-4876 and can learn more about this at https://www.medschool.lsuhs.edu/student_affairs/office_of_the_student_ombudsman.aspx

If the intern remains unsatisfied with the due process and grievance procedures, they may consider filing formal complaints outside of the internship program including ASARC with APPIC (<https://www.appic.org/Problem-Consultation>) for internship programs, SoA violation concerns with APA CoA (<http://www.apa.org/ed/accreditation/contact.aspx>) for accredited doctoral training programs, and/or ethics concerns with licensing boards (e.g., <https://www.asppb.net/default.aspx>) for ethics concerns related to individual psychologists (and also credential banking). It is important to follow timelines, instructions, etc. when using any of these processes.

EVALUATIONS

SUPERVISOR'S EVALUATION OF PSYCHOLOGY INTERN

The LSUHSC Clinical Psychology Internship Program has the responsibility to continually assess the progress of each intern. The primary purpose of this assessment is to facilitate professional and personal growth and is provided in a continual and timely way. In addition, it is particularly important that continual contact and close working relationships exist between graduate and internship programs, so that these guidelines and procedures can be implemented in a way that maximizes intern growth and development.

The internship program also recognizes that developmental stressors are inherent both in the transition from graduate school to an internship setting, as well as during the course of the internship. During the

internship, interns are exposed to full-time clinical practice, typically involving a challenging caseload as well as responding to client crises and internship requirements. For example, when entering the internship, the rapidity with which interns must assimilate into a new environment and the expectation of competency in diverse clinical activities may be a source of considerable stress. Furthermore, intern supervision is often intense, concentrated and frequent, which may increase the intern's sense of personal and professional vulnerability. Some interns may also be receiving more critical criticism and critique of their skills than they are accustomed to in prior settings. Thus, while the internship represents a critical professional opportunity when interns can learn and refine skills, gain a greater sense of professional confidence, and develop a greater sense of professional identity, it is also a time of increased stress and vulnerability.

Since trainees make significant developmental transitions during the internship and may need special types of assistance during this time, it is the responsibility of the training program to provide activities, procedures and opportunities that can facilitate growth and minimize stress. Such measures include, but are not limited to, orientation meetings, individualized programs, clear and realistic expectations, clear and timely evaluations which include suggestions for positive change, contact with support individuals (e.g., supervisors), mentorship, and/or groups (e.g., other graduate trainees, former interns, etc.), didactic seminars, and staff attention to the gradual increase in both the number and severity of clients.

In order to provide pertinent information and to derive supportive measures or appropriate remediations, it is necessary for the internship program, in concert with the individual intern, to have an accurate sense of how the intern is progressing in relation to standardized criteria or norms. Recognizing that, at best, evaluations and measures of intern performance are susceptible to bias and subjectivity, every effort is made to ensure that interns understand the program's expectations about areas, as well as levels, of performance. Further, because interns receive ongoing feedback from individual supervisors, the Training Director (TD), and other professionals with whom they have significant contact, an intern should have "no surprises" resulting from more formal evaluation procedures.

Interns are evaluated and given feedback throughout the year by their individual supervisors in both formal and informal settings. Interns are formally evaluated quarterly (every three months) and rated on the profession-wide competency areas by each supervisor. Interns need to be familiar with the content of these evaluations prior to beginning any clinical activity so that the performance dimensions are clear. At the end of each quarter, the Training Director and Associate Training Director meet with the interns individually to provide interns an opportunity to discuss potential issues/problems/concerns related to supervision as well as ways to handle any issues that may arise.

At the end of 1st and 3rd quarters, the intern's supervisors complete a brief quarterly evaluation noting the intern's strengths and areas for growth. Supervisors meet to review the quarterly evaluation and to review the intern's goals for the next quarter.

At the end of 2nd and 4th quarters, supervisors complete the comprehensive competency-based evaluation form individually with the intern and then review these as a group during a quarterly supervisors meeting in order to gain a well-rounded and thorough assessment of the intern's progress to date.

Thus, the TD/ATD receives information from all supervisors and those of others who have had significant contact with the intern, in addition to their own impressions. The intern will receive a document

showing their overall performance across supervisors and settings as well as their strengths, areas for growth, and current challenges, which is shared with their graduate program. This process is viewed as an opportunity for the TD/ATD to provide integrative feedback regarding the collective experience of others who have had significant interactions with the intern. Both parties discuss how the internship experience is progressing, and the intern is provided with the opportunity to give their reactions and critiques of supervisors and other aspects of the training experience. It may be in the context of this meeting or whenever during the rotation that a problem is identified that the TD and the intern may arrange for a modification of the intern's training program to address specific training needs and/or the needs of the training program.

It is important that in the course of the internship the sponsoring university is kept apprised of the intern's training experience. The TD communicates with the sponsoring university twice a year regarding the intern's progress. Evaluations are sent to the DCT of each graduate program mid-year and at the end of the year.

These evaluations are one of the means by which LSUHSC will help interns develop their clinical skills to the fullest. If particular skills need more attention, the evaluations should indicate this together with a plan of action for improvement (see due process guidelines for serious concerns and deficiencies). If interns do not agree with the supervisor's evaluation, they are free to write comments on the document detailing their point of view. If the psychology intern does not improve in a problem area, please refer to the policy on due process. If an intern and primary supervisor do not work well together, a change of assignment may be possible.

If an intern finds that their preliminary training is deficient in some areas, they may find it necessary or desirable to exceed the required number of training hours in order to meet internship objectives. All interns are expected to abide by the ethical standards of the American Psychological Association, the Louisiana State Law governing the practice of psychology, and Federal Law, which regulates professional behavior of mental health care providers. At all times during their professional activities, interns are expected to follow the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct which can be found at: <http://www.apa.org/ethics/code/>

INTERN'S EVALUATION OF SUPERVISOR

These evaluations help us to maintain the quality of our program by taking into account psychology interns' experiences and preferences as we continuously implement necessary changes and improvements to develop the training at LSUHSC-NO. You will rate your supervisors twice a year (mid-year and end of year). These ratings are submitted anonymously to the program coordinator. While we aim to maintain intern's anonymity, we are also cognizant of the fact that we are a small training program, and there are generally a small number of individuals rating supervisors. Supervisor evaluations are reviewed by the Training Director at the mid-point of the training year. If there are significant concerns reported, then the Training Director will meet with the intern to discuss how to proceed, i.e. addressing the concerns directly, the TD addressing the concerns with the supervisor, etc. If the TD is the supervisor, those evaluations will be reviewed by either the Associate Training Director or Section Chief. All supervisors will receive feedback from these evaluations at the end of the training year.

Each supervisor has a commitment to meet with a psychology intern one hour per week in individual, face-to-face supervision. If a supervisor is not meeting regularly with the psychology intern or is

repeatedly late for supervision, the psychology intern needs to inform the Training Director prior to the quarterly evaluation so that this situation can be corrected.

Evaluation Period	Due Dates for Evaluation Forms
July 1 – December 31	December 31 st
January 1 – June 30	June 30 th

INTERN'S EVALUATION OF PSYCHOLOGY SEMINAR

Interns complete an online evaluation form following each speaker during psychology seminar. These evaluations are required by APA and also assist the program to determine how effective and beneficial various topics and speakers are during the year.

Evaluation forms utilized during internship

Supervisors Evaluation of Interns Profession Wide Competencies OVERALL PERFORMANCE ACROSS SUPERVISORS

Intern's Name: _____
 Supervisors' Names: _____
 Settings: _____

Evaluation Period: Mid-Year End of Year

Assessment methods utilized to evaluate competency:

- Direct observation (Assessed by: _____)
- Videotape (Assessed by: _____)

_____ Total number of assessment reports completed to date
 _____ Total number of therapy cases currently active

Competency Rating Descriptions:

- 5 Practice level - Post-doctoral:** Comparable to post-doctoral expertise at the licensure level.
- 4 Practice level - End of internship:** Ready for independent practice at entry level.
- 3 Practice level - Intern:** Require routine supervision at internship level.
- 2 Practice level - Beginning internship:** Require intensive supervision.
- 1 Practice level - Practicum student:** Skills are in need of remediation plan.
- NA Not assessed** for this training experience due to the track or inability to assess skill by supervisor.

Ratings are based on how this intern's performance compares to previous interns on the same track. Any ratings at the remediation level should be referred to the Training Director and a remediation plan should be developed to assist the intern with further development in those areas.

During the mid-year evaluation, interns are expected to achieve 80% or more of their ratings at the intermediate skill level or above. In other words, at least 27 of the 34 areas should be rated intermediate or above. If the intern's performance falls below this expectation, then a remediation plan should be considered and discussed.

During the end of year evaluation, interns are expected to achieve 100% of their ratings at the high intermediate skill level or above.

-
- The intern has successfully completed the goal for this evaluation period, and we have reviewed this evaluation together.
 - The intern has not successfully completed the goal for this evaluation period. The Training Director has been made aware of the intern's areas of remediation.

RESEARCH COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other

Demonstrates the substantially independent ability to critically evaluate and disseminate research or other scholarly activities (e.g., case conference, presentation, publications) at the local (including the host institution), regional, or national level.						
Disseminate research or other scholarly activities (e.g. case conference, presentation, publications) at the local (including the host institution), regional or national level.						
ETHICAL AND LEGAL STANDARDS COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
Be knowledgeable of and act in accordance with each of the following: the current version of the APA Ethical Principles of Psychologists and Code of Conduct; relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and relevant professional standards and guidelines.						
Recognize ethical dilemmas as they arise and apply ethical decision-making processes in order to resolve the dilemmas.						
Conduct self in an ethical manner in all professional activities						
INDIVIDUAL AND CULTURAL DIVERSITY COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
Demonstrate an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves.						
Demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.						
Demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities).						
Demonstrate the ability to independently apply their knowledge and approach in working effectively with individuals whose group membership, demographic characteristics and worldviews conflict with their own.						
PROFESSIONAL VALUES AND ATTITUDES COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
Behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional						

identity, accountability, lifelong learning, and concern for the welfare of others.						
Engage in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness.						
Actively seek and demonstrate openness and responsiveness to feedback and supervision.						
Respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.						
COMMUNICATION AND INTERPERSONAL SKILLS COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
Develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.						
Produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts.						
Demonstrate effective interpersonal skills and the ability to manage difficult communication well.						
ASSESSMENT COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
Demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology.						
Demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural).						
Demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.						
Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.						
Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.						

Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.						
INTERVENTION COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
Establish and maintain effective relationships with the recipients of psychological services.						
Develop evidence-based intervention plans specific to the service delivery goals.						
Implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.						
Demonstrate the ability to apply the relevant research literature to clinical decision making.						
Modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking,						
Evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation.						
SUPERVISION COMPETENCY						
Skill Area(s)	In-patient	Out-patient	Infant Team	Specialty Rotation	GSoS	Other
