

**ADACE Mini-Retreat
December 13, 2013
Lions Bldg. 835 Conference Room**

8:15-8:45 Check-In on Lions 8th Floor; Coffee and light breakfast available

8:45-8:50 Welcome & Update: Patricia Molina, Ph.D., Director of LSUHSC ADACE

Research Talks by ADACE Pilot Grant Awardees:

8:50-9:40 *Alcohol and Cardiac Fibrosis*
Jason Gardner, Ph.D., Assistant Professor of Physiology

9:40-9:50 Coffee Break/Transition

9:50-10:40 *Chronic alcohol and SAIDS muscle wasting: FOXO1-centric inflammatory mechanisms*
Andrew Hollenbach, Ph.D., Associate Professor of Genetics

10:40 Announcement of new Pilot Grant Awardees by Nicholas Gilpin, Ph.D.

10:40-10:50 Coffee Break/Transition

Oral Research Presentations by Pre- and Post-Doctoral Trainees:

10:50-11:02 *Acute alcohol intoxication increases lymphatic permeability and promotes a perilymphatic adipose tissue inflammatory milieu*
Flavia Souza-Smith, Ph.D., Instructor, Physiology Department

11:02-11:14 *Effects of ethanol on hippocampal activity during the acquisition and performance of response sequences in rats*
Myles Ketchum, Graduate Student, Pharmacology Department

11:14-11:26 *Alcohol dependence modulates anti-anxiety neuropeptides in extended amygdala*
Britta Baynes, Graduate Student, Physiology Department

11:26-11:38 *Chronic LSD induces persistent changes in behavior and mPFC transcripts potentially relevant to schizophrenia*
David Martin, Graduate Student, Pharmacology Department

11:38-11:50 *Traumatic brain injury increases alcohol drinking in rats*
Jacques Mayeux, Graduate Student, Physiology Department

11:50-12:15 Lunch is served

12:15-1:15 *Neuronal ensembles in addiction*
Dr. Bruce T. Hope, Ph.D., Investigator, NIDA Intramural Research Program

1:15-1:20 Closing comments and meeting is adjourned
