I. Departmental Administration

Dr. Alistair Ramsay  
Department Head  
arams@lsuhsc.edu  
(504) 568-8324

Dr. Doug Johnston  
Graduate Student Coordinator  
djoh13@lsuhsc.edu  
(504) 568-4071

Dr. Joy Sturtevant  
Graduate Student Coordinator  
jsturt@lsuhsc.edu  
(504) 568-6116

Dr. Jennifer Cameron  
Graduate Student Coordinator  
jcame2@lsuhsc.edu  
(504) 568-2196

Jean Carnal  
Department Business Manager  
jcarna@lsuhsc.edu  
(504) 568-3113

Soudamini ‘Moni’ Mishra  
Associate Business Manager  
s mish3@lsuhsc.edu  
(504) 568-3113

Jasmine Richard  
Department Coordinator  
jric27@lsuhsc.edu  
(504) 568-4064

II. Departmental Faculty

Primary Appointment in MIP

Angela Martín Amedee, PhD  
Professor  
aamede@lsuhsc.edu  
(504) 568-5608

Jennifer Cameron, PhD  
Research Associate Professor  
jcame2@lsuhsc.edu  
(504) 568-2196

Timothy P. Foster, PhD  
Associate Professor  
tfoste@lsuhsc.edu  
(504) 568-4075

Jeffery A. Hobden, PhD  
Associate Professor  
jhobde@lsuhsc.edu  
(504) 568-4077

Doug Johnston, PhD  
Research Assistant Professor  
djoh13@lsuhsc.edu  
(504) 568-4071

Ben Kelly, PhD  
Associate Professor  
bkell2@lsuhsc.edu  
(504) 568-6115

Pamela A. Kozlowski, PhD  
Associate Professor  
pkozl@lsuhsc.edu  
(504) 568-6956

Meng Luo, PhD  
Research Assistant Professor  
mluo2@lsuhsc.edu  
(504) 568-3336

Alison J. Quayle, PhD  
Professor  
aquayl@lsuhsc.edu  
(504) 568-4070

Alistair J. Ramsay, PhD  
G. John Buddingh Professor and Head  
aramsa@lsuhsc.edu  
(504) 568-8324

Li Shen, MD, PhD  
Associate Professor  
lshen@lsuhsc.edu  
(504) 568-4076

Joy Sturtevant, PhD  
Professor  
jsturt@lsuhsc.edu  
(504) 568-6116

Christopher Taylor, PhD  
Associate Professor  
c taylor15@lsuhsc.edu  
(504) 568-4065

Guoshun Wang, DVM, PhD  
Professor  
g wang@lsuhsc.edu  
(504) 568-7908

Ping Wang, PhD  
Professor  
p wang@lsuhsc.edu  
(504) 568-2446

Hong Xin, MD, PhD  
Associate Professor  
h xin@lsuhsc.edu  
(504) 568-8121

Arnold H. Zea, PhD  
Research Associate Professor  
azea@lsuhsc.edu  
(504) 599-0906
Joint/Adjunct Faculty

**Luis Del Valle, MD**
Associate Professor of Pathology and MIP
S. Stanley Scott Cancer Center
ldelva@lsuhsc.edu
(504) 568-2279

**Paul Fidel, Jr., PhD**
Professor of Oral & Craniofacial Biology and MIP
LSU School of Dentistry
pfidel@lsuhsc.edu
(504) 941-8425

**Julio E. Figueroa, MD**
Professor of Medicine and MIP
jfigue@lsuhsc.edu
(504) 599-1457

**Michael Hagensee, MD, PhD**
Professor of Medicine and MIP
mhagen@lsuhsc.edu
(504) 210-3324

**Francesca Peruzzi, PhD**
Associate Professor of Medicine and MIP
S. Stanley Scott Cancer Center
fperuz@lsuhsc.edu
(504) 210-2978

**Om Prakash, PhD**
Adjunct Associate Professor of MIP
S. Stanley Scott Cancer Center
oprika@lsuhsc.edu
(504) 568-5755

**Krzysztof Reiss, MD**
Professor of Medicine and MIP
S. Stanley Scott Cancer Center
kreiss@lsuhsc.edu
(504) 210-2977

**Jessica Rivera, MD, PhD**
Associate Professor of Surgery and MIP
jrive5@lsuhsc.edu
(504) 568-4680

**Judd E. Shellito, MD**
Lowenstein Professor of Medicine Pulmonary and Critical Care Medicine
Professor, MIP
jshell@lsuhsc.edu
(504) 568-4634

**David Welsh, MD**
Professor of Medicine and MIP
Pulmonary and Critical Care Medicine
dwelsh@lsuhsc.edu
(504) 568-4634

**Zezhang ‘Tom’ Wen, PhD**
Associate Professor of Comprehensive Dentistry and Biomaterials and MIP
LSU School of Dentistry
zwen@lsuhsc.edu
(504) 941-8465

**John T. West, PhD**
Professor of DIO and MIP
Jwest6@lsuhsc.edu
(504)-210-2714

**Charles Wood, PhD**
Professor of DIO and MIP
cwool12@lsuhsc.edu
Ph: (504) 210-2702
MIP Graduate Student Manual 2023

DEPARTMENT OF MICROBIOLOGY, IMMUNOLOGY, AND PARASITOLOGY

Outline of Graduate Student Requirements

- Note that much of the information in sections A through I below will change in the near future. All Year 1 and subsequent graduate student coursework at LSUHSC is currently being re-organized into an Interdisciplinary Program. Details will be posted on the LSUHSC School of Graduate Studies website when finalized: https://graduatestudies.lsuhsc.edu

- Please check with MIP Graduate coordinators listed on page 2 if you have questions about any of the information below.

A. CURRENT COURSEWORK

YEAR 1:

FALL
- INTER 111 Biochemistry
- INTER 121 Cell Molecular Biology A
- INTER 122 Cell Molecular Biology B
- MICRO 224 Introduction to Microbial Pathogenesis
- MICRO 228 Lab Rotations in Microbiology
- MICRO 229 Analysis of Research Literature
- MICRO 298 Seminar in Microbiology
- INTER 220 Ethics in Biomedical Sciences

SPRING
- MICRO 225 Advanced Medical Bacteriology
- MICRO 276 Gen & Molecular Virology
- MICRO 296 Fundamentals in Immunology
- MICRO 228 Lab Rotations in Microbiology
- MICRO 229 Analysis of Research Literature
- MICRO 298 Seminar in Microbiology

SUMMER
- MICRO 300 Thesis Research

YEAR 2

FALL
- MICRO 231 Molecular Biology of Eukaryote Pathogens
- MICRO 250 Advanced Microbial Pathogenesis
- MICRO 229 Analysis of Research Literature
- MICRO 298 Seminar in Microbiology
- INTER 260 Responsible Conduct in Research

SPRING
- MICRO 229 Analysis of Research Literature
- MICRO 298 Seminar in Microbiology

Students must complete at least 60 credits; 30 credits graded. Students can receive a maximum of 15 credits for thesis research (MICRO 300/400), 4 credits each for Analysis of Research Literature (MICRO 229) and Seminar in Microbiology (MICRO 298).
B. ASSESSMENT

Coursework Assessment: Students may be dismissed from the program if:
- Their grade point average is below 3.0 at the end of any semester
- They receive two grades below ‘B’

Additional Assessments:
- In addition to coursework, students will be assessed during lab rotations, seminars, journal clubs, biannual committee meetings, and qualifying and preliminary examinations. These assessments will document research abilities, critical thinking and work ethic.
- Failure to make satisfactory progress in any of these areas, in the view of the mentor, may be grounds for dismissal. If this situation arises, it will be discussed first with the Department Head.

C. LABORATORY ROTATIONS

Year 1
During the first year students will participate in three lab rotations each of approximately 11 weeks duration:
- September – mid November
- Mid November – mid February
- Mid February - May
- Specific dates will be set each year

Minimal Expectations of Students During Rotation
- 20+ hours a week for rotation, including after hours and weekends as necessary
- Students must respect the schedule arranged for them by their rotation supervisor
- Written reports from the rotation supervisor will be required at the commencement and conclusion of each rotation on forms provided.
  - When the student enters the laboratory, the mentor and student will agree on and complete “Rotation Form I” describing reasonable goals for the rotation. (See back of manual for rotation forms). The form will then be submitted to mipgrad@lsuhsc.edu.
  - At end of the rotation: the mentor and student will agree on accomplishments and techniques achieved by the student and to what level the goals were reached.
- At the end of the rotation: the mentor will complete “Rotation Form II’ and submit this to mipgrad@lsuhsc.edu. The form will be placed in the student file.
- Students will receive a grade of satisfactory or unsatisfactory for each rotation.
- Students can be dismissed from the program due to unsatisfactory performance in lab rotations.
- Students will finalize a lab/mentor for their PhD study before June 1 in their first year.
- Students will work full time on their dissertation project during the summer between year 1 and 2.

D. COMMITTEE MEETINGS

YEAR 2
DISSERTATION COMMITTEE
- At the beginning of the second year of graduate study, the student and mentor will select a Dissertation Committee.
- The membership of the Committee must be approved by the Department Head.
- The Committee will comprise at least 5 Graduate Faculty Members of LSUHSC including:
  A. At least 3 LSUHSC-MIP Graduate Faculty including mentor,
  B. At least 1 non-MIP LSUHSC Graduate Faculty (note A + B must equal at least 5).
  The addition of a faculty member external to LSUHSC is encouraged.
- The completed Dissertation Committee form is submitted to mipgrad@lsuhsc.edu
COMMITTEE MEETINGS

- At the beginning of the second year of graduate study, the student and mentor will select a dissertation committee.
- At the first committee meeting, the committee will elect a chairperson (not the mentor), who is responsible for the conduct of committee meetings and finalization of meeting reports.
- Committee meetings will be held at least once every 6 months.
  - Regular committee meetings are held for the duration of the student’s membership of the MIP graduate program, including after the preliminary exam.
  - The student is responsible for setting the time and location of each meeting, preferably via a Doodle poll or direct contact with committee members.
  - MIP graduate students present a research seminar each year - ideally, one of the 6-monthly committee meetings is scheduled for directly after the seminar.
- The student must provide a report to all committee members at least 3 days before each committee meeting, including:
  - a ‘specific aims-style’ document of one page in length, including a short introduction of the subject area; the significance of project, and the specific aims of project. This document should be in NIH style, but can be less formal, e.g. can be in bulleted form.
  - a 1 to 2-page progress report describing the work accomplished since the previous meeting. This must address each of the 6-month goals stated in the previous committee report and should NOT be replaced by a copy of any powerpoint/seminar presentation.
  - goals for the next 6-month period.

- As soon as possible after each committee meeting, a report will be prepared, including an assessment of:
  - the level of understanding of the project and methodologies as reflected by the ability of the student to present and discuss all aspects of the work.
  - satisfactory completion of 6-month goals (or appropriate effort being made).
  - goals and expectations for next 6-month period.
  - the potential of the work for publication.

The preparation of the committee meeting report is coordinated by the committee chair. The report is finalized after agreement of the committee and is discussed with the student and mentor. Copies of the report are emailed to the student, the mentor and mipgrad@lsuhsc.edu

YEARS 2 – 5

- Committee meetings should occur at least every 6 months.
- Written requirements of the student prior to each meeting, and meeting reports, are as above.

If the committee believes that the student is not making appropriate effort towards the defined 6-month goals at two consecutive committee meetings, then this may represent sufficient reason for dismissal of the student from the program. If this situation arises, it will be discussed first with the Department Head.

E. SEMINAR/JOURNAL CLUB

ALL YEARS

Seminar

- Attendance at MIP departmental seminars and dissertation defense seminars is mandatory for all MIP graduate students.
- Each student is required to present work in progress at the departmental seminar series once during each calendar year of enrollment.
• Year 1 students will present work from a rotation, typically near the end of the Spring semester.

Graduate Journal Club (MICRO 229)

• All students are required to attend and participate in the Analysis of Research Literature course (MICRO 229) in every semester that it is offered throughout their PhD studies. This course comprises journal club presentations and discussion.

• Students are also encouraged to participate in a ‘discipline-based’ journal club within the department if not engaged in this activity during regular meetings of their own laboratory.

• Participation in Analysis of Research Literature course and journal clubs will be discussed at dissertation committee meetings.

F. QUALIFYING EXAMINATION

YEAR 2

• Students will take the qualifying exam before the end of year 2. The qualifying exam and instructions are described in detail in Appendix 3.

• At the completion of the oral examination, the Qualifying Examination Committee will discuss student performance and determine if the student passed or failed.

• If the student passes, he/she receives approval to continue with his/her Ph.D. research project.

• If the student fails, the committee may provide the option to retake the exam. If the committee does not provide the option to retake the exam, the student may continue in the program to obtain a MS degree (Masters in Biomedical Science). The option to re-take the exam after the completion of a MS degree may be provided after further discussion with the mentor, department head, and committee.

G. PRELIMINARY EXAMINATION

YEAR 3

• According to Graduate School policy, the student must pass the preliminary exam at least one academic year (3 consecutive semesters) before the final defense examination.

• Students are required to take the preliminary exam by the end of their 3rd year.

• The preliminary exam and instructions are described in more detail in Appendix 4.

• A completed, typed ‘REQUEST FOR PRELIMINARY EXAMINATION FORM’ should be sent to the Graduate School at least 2 weeks prior to the examination date.

• A report of the outcome of the preliminary exam is written up by the Committee Chair, distributed to committee members for comment, and the final draft then sent to mipgrad@lsuhsc.edu and filed in the student records.

• A completed ‘REPORT OF PRELIMINARY EXAMINATION FORM’ must be sent to the Dean of the School of Graduate Studies following completion of the committee’s recommendation.

YEAR 4

• Register for MICRO 299 (Grant Proposal in Microbiology) in the semester after the preliminary examination is completed.

H. MANUSCRIPTS

YEARS 3-5

• Outlines of manuscripts to be submitted for publication should be discussed at committee meetings.

• It is desirable that a manuscript for publication in a peer-reviewed journal and pertaining to dissertation work is in draft form (or submitted) by the time of the preliminary examination.

• Acceptance for publication of a minimum of one primary authored manuscript pertaining directly to the dissertation work in a peer-reviewed journal is required for graduation.
• Exceptions are possible with the permission of the Department Head. These include:
  o Manuscript submission delayed by patent application.
  o Article submitted and reviewed, but requires revision pending acceptance.
  o In such instances, the student must submit a draft manuscript to the dissertation committee.

I. FINAL EXAMINATION
YEAR 4/5
• Guidelines for writing the dissertation can be found at:

• A completed ‘REQUEST FOR DISSERTATION DEFENSE FORM’ and a copy of the Dissertation Abstract must be received by the Graduate School at least two weeks prior to the defense date.

• Copies of the Dissertation must also be circulated to the dissertation committee at least two weeks prior to the defense date.

• A seminar on the contents of the dissertation (public defense) will be presented at the time of the dissertation defense.

• The seminar must be publicized at least two weeks prior to the examination date with the scheduled time and location.

• The committee will conduct the examination based on the contents of the dissertation and matters pertaining to the dissertation and will then decide by vote if the student has passed. Two or more negative votes will constitute a basis for failure of the examination.

• If the committee determines that the student has passed the examination, but that corrections to the dissertation are necessary, the student is given a limited amount of time to make these corrections. Committee members may agree to leave final approval of corrections to the major professor, or may require to see the corrected dissertation.

• The major professor and student will have the DISSERTATION FINAL EXAMINATION REPORT Form ready for committee members to sign upon completion of the final examination. Committee members will sign this form to indicate pass or failure of the exam at the meeting. However, the Department Head will sign this form only after notification that final corrections, if any, have been made to the satisfaction of the committee and/or major professor.
MIP GRADUATE STUDENT CHECKLIST

YEAR 1: SUMMARY CHECKLIST
• Complete coursework and maintain ≥ 3.0 average
• Complete 3–4 lab rotations with satisfactory review from faculty
• Choose a laboratory for PhD research program
• Present a MIP seminar based on work in progress
• FORM CHECKLIST for Student Record folders
  Lab rotation I Part I and Part II
  Lab rotation II Part I and Part II
  Lab rotation III Part I and Part II
  Lab rotation IV Part I and Part II (optional)
  Seminar critique
  Selection of mentor

YEAR 2: SUMMARY CHECKLIST
• Complete coursework and maintain ≥ 3.0 average
• Finalize dissertation committee
• Pass qualifying exam
• Presentation of seminar in MIP
• Presentation at MIP journal club
• Commence committee meetings
• FORM CHECKLIST for Student Record folder
  Dissertation Committee member list
  Report/summary of qualifying exam by qualifying committee chair
  Report of 1st committee meeting
  Seminar critique

YEAR 3: SUMMARY CHECKLIST
• Dissertation Committee meeting at least once every 6 months
• Preliminary examination
• Presentation of seminar in MIP
• Presentation at MIP journal club
• FORM CHECKLIST for Student Record Folder
  Summary report of result of preliminary exam by mentor for committee and student
  Report of committee meeting year 3 (1)
  Report of committee meeting year 3 (2)
  Seminar critique
• FORM CHECKLIST for School of Graduate Studies
  Request for exam form two weeks before exam
  Report of Preliminary Examination signed by committee
YEARS 4/5: SUMMARY CHECKLIST

- Dissertation Committee meeting at least once every 6 months
- Presentation of seminar in MIP each year
- Presentation at MIP journal club each year
- Submission of at least one manuscript to peer reviewed journal
- **FORM CHECKLIST for Student’s Record Folder**
  - Report of committee meeting year 4 (1)
  - Report of committee meeting year 4 (2)
  - Report of committee meeting year 5 (1)
  - Report of committee meeting year 5 (2)
  - Seminar critique year 4
  - Seminar critique year 5
- **FORM CHECKLIST for DISSERTATION DEFENSE**
  - Request for Dissertation Defense and Abstract to School of Graduate Studies two weeks prior to defense
  - Dissertation Seminar Title, location publicly advertised school-wide two weeks prior to defense
  - Dissertation distributed to committee two weeks prior to defense
  - Dissertation completion (pass) paperwork submitted to School of Graduate Studies;
  - Submit corrected dissertation to School of Graduate Studies

* In some years these courses may not be offered; MICRO 250 is a required course when offered in student’s second year in department.
† Selected Topics may be offered as graded or pass/fail.
‡ Non-graded; maximum number of credits that can be received

Suggested electives:
- BIO 6100 Biostatistical methods 4 credits
- BIOCH 299 Professional Skills-Graduate Students 1 credit Spring (not graded)
SAMPLE CURRICULUM FOR REGISTRATION FOR MIP PROGRAM (M.D./Ph.D.)

Students must take the Qualifying Examination by the end of their second year of Graduate Studies. Satisfactory progress: GPA ≥ 3.0; passing of the Qualifying Examination and demonstration of successful progress as determined through committee meetings.

In subsequent years, students will register for 9 credits / semester. They will be required to participate in MIP seminar and Analysis of Research Literature every semester.
APPENDIX 3: Qualifying Exam instructions

The qualifying exam will consist of two parts. Part A will consist of 3 questions given over 3 half days. Part B will be an oral defense of the student’s answers to Part A within 2 weeks of completion of Part A. The exam must be completed by the conclusion of the summer semester of the second year.

Part A. The questions.

1. The qualifying committee will prepare 3 questions per student. These will come from general areas covered in the required coursework: Virology, Immunology, Medical Bacteriology, Molecular Biology/Eukaryotic Pathogens.
2. Over 3 days the student will be given one question each day and have 4 hours to respond to it. The student will have full access to books, journals and the internet. This portion of the exam is OPEN BOOK. However, students may not solicit help from elsewhere.

PART A. Evaluation.

1. Each response will be read by two committee members.
2. The qualifying committee member who wrote the question will read and critique the response. The critique can be written on a separate page or written legibly in the margins of the student’s response.
3. The second committee member will act as a reader and will complete a separate shorter review.
4. Written critiques must be received no later than 1 week prior to oral examination.
5. No committee member will be responsible for the primary critique for more than one question per student.
6. A committee member will not be responsible for the critiques if they are the student’s mentor.
7. The chair of the committee will be responsible for assigning primary and reader (unless he/she is the student’s mentor; in which case another committee member will act as chair).

PART B. Oral portion.

1. This portion of the exam must be taken within 2 weeks of completion of Part A.
2. This portion of the exam will last no longer than 4 hours and will consist of the student's oral defense of their response and/or changes in their response based on critiques.
3. The mentor of the student will be present but cannot participate either verbally or otherwise.
4. The committee will ask questions in reference to the original question in which the student will have to orally defend his/her original response – or defend changes in response based on the critique.

PART B. Evaluation.

1. The qualifying committee members will evaluate the student’s performance and determine if the student passed or failed.
   a. The mentor does not generally participate in the final vote, but may clarify matters concerning the student.
   b. In the unlikely event that the committee does not come to an agreement, the matter will be discussed with the Department Head.
2. If the student passes, he/she becomes a candidate for the Ph.D. degree.
   a. The committee may ask the student to rewrite an answer to confirm that the student understands the nature of critiques raised during the oral portion of the exam.
3. If the student fails:
   a. He/she may be given the option to retake the exam. This may occur if the committee feels the student for some reason did not perform to his/her best ability or there were extenuating circumstances.
   b. If the student is not given the option to retake the exam, he/she may be given the option to obtain a MS degree.
APPENDIX 4: Preliminary Exam instructions

LOGISTICS
- The preliminary examination should be taken before the end of the third year of graduate studies. The focus of the examination is on a proposal prepared by the student and based on their dissertation project (see details of required format and grading information below).
- The student will arrange a time and date with the committee. A DOODLE poll is recommended and a reservation for at least three hours is suggested. Once the exam is scheduled, the student should reserve a conference room.
- Note also that the preliminary exam must be passed at least one academic year (ie. 3 consecutive semesters) before graduation.
- The research proposal must be circulated to the Dissertation Committee at least two weeks prior to the examination date.
- The completed, typed REQUEST FOR PRELIMINARY EXAMINATION FORM must be sent to the Graduate School at least two weeks prior to the examination date.

FORMAT
- The proposal is to be presented in NIH RO1 grant format: containing the following elements: Specific Aims; Abstract; Research Plan (no longer than 12 pages); Vertebrate Animals (if necessary), Human Subjects (if necessary) and References.
  - While the proposal should be prepared in R01 format, it should primarily reflect the student’s dissertation project. It need not, therefore, be written as a formal funding application rigidly embodying a proposed five-year research plan.
  - Description of experiments and sub-aims already completed should be included, either as preliminary results within the description of an Aim in the Research Plan, or (if an Aim is essentially completed) as a progress report.
  - If the student already has a publication directly related to the proposed thesis work, this can be included as an addendum.
  - Alternative grant formats (eg. an F30 or R21 application) should not be substituted for the above.
- The Specific Aims page may be viewed and edited by the mentor. The mentor may also view and provide feedback on an outline of the Research Plan. However, the mentor should not extensively edit drafts of the Research Plan.
- If the committee believes that the submitted proposal is incomplete or otherwise unsatisfactory, then the preliminary examination should be postponed. The committee chair will write a memo stating why the proposal is unsatisfactory and outline how it should be revised.

EXAM
- The student should prepare a Powerpoint presentation that includes Specific Aims, the major points of the proposal, and key data.
- While the submitted proposal will be discussed, the exam will be graded on the oral /powerpoint presentation and related discussion.
- The student may be questioned on any area of microbiology and related fields.
- The projected goals will normally be discussed.
- The results of the Preliminary Examination will be determined by a vote of the committee as follows:
  - Pass - student becomes a candidate for the Ph.D. degree.
  - Fail - two dissenting votes may constitute a basis for failure. The committee will discuss the following options.
    ▪ Failure – no re-examination. The student may have the option to complete a Master’s Degree.
Failure – re-examination. This should generally take place within six months of the first Preliminary Exam. The committee will decide on the format:

- The student may be asked to rewrite the entire proposal, or particular sections, prior to the oral examination.
- The student may be asked to write a progress report prior to an oral examination.

- A FOLLOW UP REPORT OF PRELIMINARY EXAMINATION FORM (typed) must be signed by all committee members and the Department Head and sent to the Dean of the School of Graduate Studies.
- The committee chair will write a summary of the preliminary examination and submit to mipgrad@lsuhsc.edu
- The student should register for course credit (Microbiology 299, 3 hours credit) for this proposal in the semester after passing the exam
  - The highest grade that the student can obtain for the course in the event of a re-write and/or re-examination is a ‘B’.
