

PROSPECTIVE NATURAL HISTORY STUDY OF

THE LOSS OF BALANCE IN USH1C

A Prospective Natural History Study of the Loss of Balance in Usher Syndrome Type 1C (USH1C) is being conducted to assist in the development of treatments.

- Open to USH1C patients
- The information collected for this research study will include genetic testing, balance and inner ear testing, as well as questionnaires.
- Confidentiality will be maintained.
- Participants will be required to travel (reimbursement provided).
- Location: LSUHSC Hearing and Balance Center at Our Lady of the Lake Hospital in Baton Rouge, Louisiana

Natural History Studies allow researchers and clinicians to understand disease so they can develop new ways to diagnose, prevent, and determine treatments.

TO PARTICIPATE IN THIS STUDY
