MMR (Measles, Mumps, Rubella) – 2 doses of MMR vaccine or two (2) doses of Measles, two (2) doses of Mumps and (1) dose of Rubella; or serologic proof of immunity for Measles, Mumps and/or Rubella. Choose only one option.					Copy Attached
Option 1	Vaccine	Date			
MMR -2 doses of MMR vaccine	MMR Dose #1				☐
	MMR Dose #2				
Option 2	Vaccine or Test	Date			
Measles -2 doses of vaccine or positive serology	Measles Vaccine Dose #1		Serology Results		☐
	Measles Vaccine Dose #2		Qualitative Titer Results:	☐ Positive ☐ Negative	
	Serologic Immunity (IgG antibody titer)		Quantitative Titer Results:	_____ IU/ml	
Mumps -2 doses of vaccine or positive serology	Mumps Vaccine Dose #1		Serology Results		☐
	Mumps Vaccine Dose #2		Qualitative Titer Results:	☐ Positive ☐ Negative	
	Serologic Immunity (IgG antibody titer)		Quantitative Titer Results:	_____ IU/ml	
Rubella -1 dose of vaccine or positive serology	Rubella Vaccine		Serology Results		☐
			Qualitative Titer Results:	☐ Positive ☐ Negative	
	Serologic Immunity (IgG antibody titer)		Quantitative Titer Results:	_____ IU/ml	
Tetanus-diphtheria-pertussis – One (1) dose of adult Tdap. If last Tdap is more than 10 years old, provide dates of last Td and Tdap					
	Tdap Vaccine (Adacel, Boostrix, etc)				☐
	Td Vaccine (if more than 10 years since last Tdap)				
Varicella (Chicken Pox) - 2 doses of vaccine or positive serology					
	Varicella Vaccine #1		Serology Results		☐
	Varicella Vaccine #2		Qualitative Titer Results:	☐ Positive ☐ Negative	
	Serologic Immunity (IgG antibody titer)		Quantitative Titer Results:	_____ IU/ml	
Influenza Vaccine - 1 dose annually each fall					
	Flu Vaccine				☐
COVID-19 Vaccine - 1 dose of updated 2025-2026 COVID-19 vaccine if previously vaccinated with any COVID-19 Vaccine, administered ≥8 weeks after the last dose.		Date			
	Pfizer-BioNTech COVID-19 vaccine (Comirnaty)				☐
	or Moderna COVID-19 vaccine (Spikevax)				
	or Moderna COVID-19 vaccine (mNexspike)				
	or Novavax COVID-19 vaccine (Nuvaxoid)				

AAMC Standardized Immunization Form

Name: _____ Date of Birth: _____
(Last, First, Middle Initial) (mm/dd/yyyy)

Hepatitis B Vaccination - 3 doses of Engerix-B, Recombivax HB or Twinrix vaccines or 2 doses of Heplisav-B vaccine followed by a QUANTITATIVE Hepatitis B Surface Antibody test drawn 4-8 weeks after last vaccine dose. A test titer ≥ 10 mIU/mL is positive for immunity. If the test result is negative, CDC guidance recommends that HCP receive one or more additional doses of Hepatitis B vaccine up to completion of a second series, followed by a repeat titer test 4-8 weeks after the last vaccine dose. If a single additional vaccine dose does not elicit a positive test result, administer additional vaccine doses to complete the second series using the schedule approved for the primary series of a given product. If the Hepatitis B Surface Antibody test is negative (<10 mIU/mL) after receipt of 2 complete vaccine series, a "non-responder" status is assigned. See: http://dx.doi.org/10.15585/mmwr.r6701a1 for additional information.				Copy Attached
Primary Hepatitis B Series Heplisav-B only requires two doses of vaccine followed by antibody testing	3-dose vaccines (Engerix-B, Recombivax HB, Twinrix) or 2-dose vaccine (Heplisav-B)	3 Dose Series	2 Dose Series	☐
	Hepatitis B Vaccine Dose #1			
	Hepatitis B Vaccine Dose #2			
	Hepatitis B Vaccine Dose #3			
	QUANTITATIVE Hep B Surface Antibody Test		_____ mIU/ml	
Additional doses of Hepatitis B Vaccine <u>Only If no response to primary series</u> Heplisav-B only requires two doses of vaccine followed by antibody testing		3 Dose Series	2 Dose Series	☐
	Hepatitis B Vaccine Dose #4			
	Hepatitis B Vaccine Dose #5			
	Hepatitis B Vaccine Dose #6			
	QUANTITATIVE Hep B Surface Antibody Test		_____ mIU/ml	
Hepatitis B Vaccine Non-responder	If the Hepatitis B Surface Antibody test is negative (titer less than 10 mIU/mL) after a primary and repeat vaccine series, vaccine non-responders should be counseled and evaluated appropriately. Certain institutions may request signing an "acknowledgement of non-responder status" document before clinical placements.			
Additional Documentation				
<u>Some institutions</u> may have additional requirements depending upon rotation, school requirements or state law. Examples include meningitis vaccine which is mandated in some states if you live in dormitory style housing. If you will be participating in an international experience, you may also be required to provide proof of vaccines such as yellow fever or typhoid.				
Vaccination, Test or Examination	Date	Result or Interpretation		
Physical Exam (if required)			☐

(Last, First, Middle Initial) (mm/dd/yyyy)

TUBERCULOSIS (TB) SCREENING – All U.S. healthcare personnel are screened pre-placement for TB. Two kinds of tests are used to determine if a person has been infected with TB bacteria: the TB skin test (TST) and the TB blood test (IGRA). Results of the last two TSTs or one IGRA blood test are required **regardless** of prior BCG status. If the TST method is used, record the dates and results of two 1-step annual TSTs over the last two years, or of one 2-step TST protocol (two TSTs performed with the second TST placed at least 1 week after the first TST read date). In either series, the second TST must have been placed within the past 12 months prior to clinical duties, and must have been performed in the U.S. If you have a history of a positive TST (PPD) >10mm or a positive IGR blood test, please supply information regarding any evaluation and/or treatment below. You only need to complete ONE section, A or B.

Skin test or IGRA results should not expire during proposed elective rotation dates or must be updated with the receiving institution prior to rotation.

Tuberculosis Screening History

Please complete only one TB section based on your history	Section A		Date Placed	Date Read	Result	Interpretation
	History of Negative TB Skin Test or Blood Test T-spots or QuantiFERON TB Gold blood tests for tuberculosis Use additional rows as needed	TST #1			_____ mm	☐ Pos ☐ Neg ☐ Equiv
		TST #2			_____ mm	☐ Pos ☐ Neg ☐ Equiv
			Date	Result		
		QuantiFERON TB Gold or T-Spot (Interferon Gamma Releasing Assay)		☐ Positive ☐ Negative ☐ Indeterminate		
		QuantiFERON TB Gold or T-Spot (Interferon Gamma Releasing Assay)		☐ Positive ☐ Negative ☐ Indeterminate		
	Section B		Date Placed	Date Read	Result	
	History of Positive Skin Test or Positive Blood Test	Positive TST			_____ mm	
				Date	Result	
		QuantiFERON TB Gold or T-Spot (Interferon Gamma Releasing Assay)		☐ Positive ☐ Negative ☐ Indeterminate		
		Chest X-ray*		*Provide documentation or result		
Treated for latent TB infection (LTBI)?		☐ Yes ☐ No				
Date of Last Annual TB Symptom Questionnaire
