Caroline Raasch Alquist was born in Cincinnati, Ohio, and attended Wake Forest University in Winston-Salem, North Carolina. A graduate of the Louisiana State University Health Sciences Center MD/PhD program, Dr. Alquist has remained in New Orleans. She is currently a second-year resident in the Department of Pathology and resides downtown with her husband William and their pets: two cats, Tox and Henselae, and their dog Brucella.

Dr. Alquist has a strong professional interest in interdepartmental collaborations and publications. Two of her articles have been published in the *Journal of the Louisiana State Medical Society* since the beginning of her residency. The Anatomic and Clinical Pathology training program provides her with constant opportunities to pursue creative outlets while expanding her knowledge base. The featured cover image of psammomatous meningioma and the adjacent image of a pleomorphic adenoma serve to emphasize her interest in not just scholarly works, but also the artistic qualities inherent in gross and microscopic imagery.

*Daisy Heads*, Caroline Raasch Alquist, MD, New Orleans, Louisiana. Photomicrograph of hematoxylin and eosin (H&E) stain of a tyrosine crystal within a pleomorphic adenoma. 400X magnification.
