

- **PEDI 420 – Elective – HEME/ONC**

- o Students' primary role the Heme-Onc elective is participation in Children's Hospital of New Orleans hematology-oncology clinics. In addition, students will attend weekly tumor conference, microscopy teaching seminars, journal club & protocol review, and procedures, including bone marrow aspirations and spinal taps. Evaluations by faculty and fellows are based on clinic attendance, demonstration of interest as demonstrated by participation in clinical activities, and evidence of acquired knowledge through contributions to patient assessment and management plans. Based on availability and interest, students can request 2 weeks of clinic and 2 weeks of inpatient.
