

LSUHSC Physiology Fall 2019 Seminar Series Speaker	Seminar Title	Date
Dr. Sarah Lindsey Associate Professor of Pharmacology Tulane University School of Medicine	Sex Differences in Arterial Stiffness	August 22
Dr. Chindo Hicks Professor of Genetics and Bioinformatics LSUHSC New Orleans	Unravelling the Polygenic Architecture of Triple Negative Breast Cancer Using Integrative Genomics	September 5
Dr. Andrea Johnston Assistant Professor of Small Animal Internal Medicine Louisiana State University	The Role of Phosphoglycerate Mutase 5 (PGAM5) in Alcoholic Liver Disease	September 12
LT Travis Doggett, PhD, MSC, USN Research Physiologist Deputy Department Head N32 Navy Experimental Diving Unit	Career Opportunities in the Navy	September 13
Dr. Rajani Maiya Research Scientist The University of Texas at Austin	Transcriptional Regulation of Motivated Behaviors by LMO4	September 17
Dr. Rob Gereau Director Washington University Pain Center	CNS Circuits Mediating Sensory and Affective Aspects of Itch and Pain	September 19
Dr. John Cork Associate Professor Department of Cell Biology and Anatomy LSU Health Sciences New Orleans	Development of Online Resources for Teaching and Research	September 26
Dr. Michael Salling Assistant Professor Department of Cell Biology and Anatomy LSU Health Sciences New Orleans	Frontal Cortex Function Following Adolescent Alcohol Consumption	October 3
Dr. Robert Carroll Professor of Physiology Associate Dean for Medical Education Brody School of Medicine at East Carolina University	Are we really teaching adults, and if so, so what?	October 7
Dr. Martin Ronis Professor Department of Pharmacology LSU Health Sciences New Orleans	Molecular Mechanisms of Skeletal Toxicity Resulting from Alcohol Abuse and Consumption of Coplanar Polychlorinated Biphenyls (PCBs)	October 17
Dr. Bernd Schnabl Professor of Medicine University of California at San Diego	Translating Microbiota Research Into Therapies for Alcohol-Related Liver Disease	October 24
Dr. Fabricio Do Monte Assistant Professor Department of Neurobiology & Anatomy University of Texas Health Science Center at Houston	Overcoming Fear to Obtain Food: A Neural Circuit Study	November 1
Dr. Xinping Yue Assistant Professor of Physiology LSU Health Sciences New Orleans	Chronic Nicotine Inhalation and Cardiopulmonary Dysfunction	November 7
Dr. Rajani Maiya Research Scientist The University of Texas at Austin	Teaching Seminar	November 11
Dr. Rajani Maiya Research Scientist The University of Texas at Austin	Chalk Talk	November 11
Hannah Fulenwider Neuroscience PhD Candidate University of Georgia	Sex Differences in Alcohol- and Oxycodone-Seeking Behaviors	November 13
Dr. Ziva Cooper Assistant Professor Clinical Neurobiology Columbia University Medical Center	Controlled Human Studies of Emerging Trends in Cannabis Use	November 14
Dr. Melissa Herman Assistant Professor Department of Pharmacology University of North Carolina -Chapel Hill	Brainstem and Central Amygdala Circuitry in Alcohol and Nicotine-Associated Plasticity and Behavior	November 21

Dr. Susan Wray Professor of Physiology The University of Liverpool	Ants, Antacids and Labour – Recent Updates in Myometrial Physiology	December 3
Dr. David Eisner Professor of Cardiac Physiology University of Manchester	Control of Calcium in the Heart: Free and Beyond	December 3
Dr. Zhe Wang Assistant Professor of Chemistry Xavier University of Louisiana	Electrochemical Bio-detections: Towards Point-of-care Cancer Diagnosis	December 12
