Fellow Research Projects Presented at the ATS in May 2019

SONARR (Sonographic Measurement of the Optic Nerve Sheath Diameter as a Neuroprognosticator Post-Arrest)

Echocardiographic Estimate of Pulmonary Artery Compliance in Acute Pulmonary Embolism

Acute Right Mainstem Airway Occlusion Post Pulmonary Artery Pseudoaneurysm Embolization

Predictors of Higher-Level Mobility in ICU Patients with Delirium

Examination of the Interventricular Septum to Discriminate Group 2 from Non Group 2 Pulmonary Hypertension

Right Atrial to Pulmonary Artery Wedge Pressure (RA/PAWP) Ratio Across the Hemodynamic Spectrum in Pulmonary Hypertension

Association Between Tobacco Smoking, Lung Function, Echocardiography, and Hemodynamics in Patients with Pulmonary Hypertension.

Influence of Race on BNP Levels and Pulmonary Function Tests in Patients with Pulmonary Hypertension
