

LSU has partnered with Clinetic to make patient identification and recruitment easier for study teams

## How Clinetic Streamlines Screening

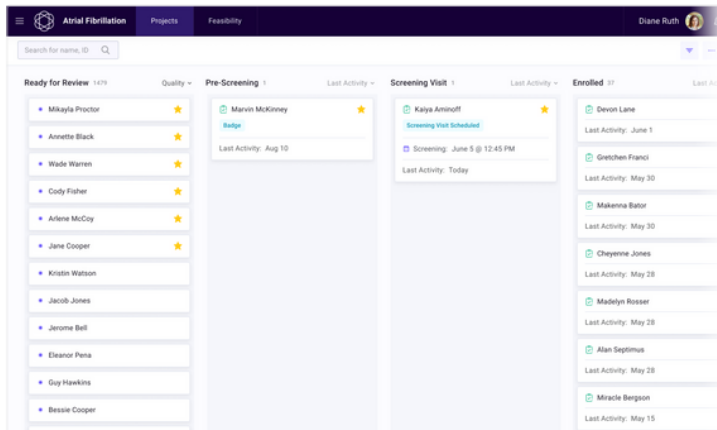

1. Clinetic’s team of experts, including medical coders and physicians, configures each study based on its unique inclusion/exclusion criteria using notes, labs, diagnoses, and more — no need to wait in IT/data support queues!

2. The prioritized Clinetic patient queue is continuously updated on a daily basis with newly eligible patients ensuring you do not miss eligibility windows.

3. Relevant patient health records are curated and surfaced within the Clinetic platform for coordinator review to simplify screening - no more digging through records to find key details!

4. Clinetic’s Workflow Co-Pilot user interface supports your recruitment workflow (pre-screening patients, logging outreach attempts) and simplifies operational tasks like reporting.

## Essential Elements - We Heard You!

Clinetic’s configurable Workflow Co-Pilot user interface was designed based on the feedback of 100+ CRCs

The Clinetic team of coding and clinical experts will build complex cohorts for you and iterate based on your feedback

To create the most accurate patient cohorts, Clinetic searches a variety of data sources including notes, labs, medications, procedures, diagnoses, and report narratives

Prioritization of patients in the queue helps ensure you focus on the right patients at the right time, including those who have an upcoming appointment!

LSU and Clinetic have addressed data security, HIPAA, and compliance requirements so your study meets all regulatory standards without extra hassle

To use Clinetic on your study, please contact [research@clineti.com](mailto:research@clineti.com).
