The Sarnoff Fellowship Program offers medical students enrolled in accredited U.S. medical schools the opportunity to spend a year conducting intensive work in a biomedical research facility in the United States. Although applicants may have prior research experience, applications are also encouraged from students without extensive prior research experience.

Fellows are selected on the basis of a national competition. Sarnoff seeks individuals with demonstrated intellectual and academic achievement, as well as leadership ability. Applicants enrolled in an MD/PhD program will not be eligible for a Sarnoff Fellowship.

Applications are encouraged from second and third year medical students. Fourth year medical students are required to submit an official letter from their medical schools granting graduation deferment.

There are no citizenship requirements for application, but those who are not U.S. citizens must have and maintain an appropriate visa. The Foundation will not handle visa matters for applicants.

The Sarnoff Foundation is committed to promoting diversity in the biomedical and scientific community. We strongly encourage applicants from members of underrepresented or historically disadvantaged backgrounds.

Each applicant must submit the following:

One-page personal statement describing scholarly interests and career plans

Three-page essay on the applicant's cardiovascular topic of interest

Completed application form and signed statement of confidentiality

Official medical school transcript

Curriculum vitae

Recommendation from the applicant's Sponsor

Two additional recommendations

Any other material that the applicant determines is appropriate to support the application

To Apply visit

www.SarnoffFellowship.com

online application available in August 2021

Annual Stipend: \$35,000

Mentorship through Sarnoff

The cornerstone of the Sarnoff Fellowship is the special interaction between the medical students and the laboratory Preceptor with scientific and mentoring expertise. This close relationship, developed during the course of the Fellowship, and continuing throughout the Fellow's career, is enhanced by additional interactions with the Sarnoff Scientific Committee and Sarnoff Alumni. These experiences cultivate a life-long appreciation and enthusiasm for cardiovascular investigation, leading many to choose a career in cardiovascular research. The Foundation's investment in the Sarnoff Fellow is life-long.

Allowances up to \$8,000 for travel support to select a Preceptor and Fellowship laboratory and attend the Sarnoff Annual Scientific Meeting and American Heart Association Scientific Sessions, moving expenses, health insurance and funds for travel to present a paper at two national conferences

Deadlines

Application: January 12, 2022

No extensions or exceptions will be made for these deadlines
