Thank you for your interest in the LSU Vascular Surgery 0+5 residency program. We look forward to working with you during your virtual away rotation. The SARS-CoV2 pandemic presents an unusual challenge for prospective medical students to safely partake in sub-internship rotations at an outside institution. At LSU, we understand the importance of away rotations for future trainees.

We have developed a virtual away rotation for interested fourth-year medical students that are applying for a residency position in the 2021 match. The program will provide an opportunity to maximize exposure to the culture at LSU Vascular and interact with faculty/residents. The curriculum will include virtual involvement in clinical and academic training experiences. Our intent is for prospective trainees to enhance their understanding of the pathogenesis and treatment of vascular disease.

Our integrated program was started in 2012. We accept two residents each year. Our six graduates are working in a variety of academic and private practice settings. Our program offers a wide range of high volume experiences in Vascular and Endovascular Surgery in different clinical settings. Trainees rotate through a level 1 tertiary care center, private hospitals, and a VA. Given our location in southeast Louisiana, trainees are exposed to a large volume and variety of vascular pathology. Our graduates routinely finish with open and endovascular case volumes in the top 10th percentile.

GENERAL INFORMATION

This course is designed for 4th-year medical students interested in vascular and endovascular surgery.

DIRECTOR:
Malachi G. Sheahan III, MD
Claude C. Craighead Jr., Professor and Chair
Division of Vascular and Endovascular Surgery
Program Director

ADMINISTRATOR:
Rachael L. Carrington, MBA
Vascular Surgery Residency Coordinator

INSTRUCTORS:
Robert Batson, MD
Isidore Cohn Jr. Professor & Chair Department of Surgery
Larry Hollier, MD  
Professor of Surgery and Chancellor LSU School of Medicine

Claudie Sheahan, MD  
Professor of Clinical Surgery

London Guidry, MD  
Associate Professor of Clinical Surgery  
Assistant Program Director

Tapash Palit, MD  
Associate Professor of Clinical Surgery

Bruce Torrance III, MD  
Associate Professor of Clinical Surgery

William Risher, MD  
Professor of Surgery and Section Chief of Cardiothoracic Surgery

Marie Unruh, MD  
Assistant Professor of Clinical Surgery

Nicolas Zea, MD  
Assistant Professor of Clinical Surgery

Amit Chawla, MD  
Assistant Professor of Clinical Surgery and Chief of Vascular Surgery at the VA

Amadis Castoriano, MD  
Assistant Professor of Clinical Surgery

FELLOWS/RESIDENTS:  
https://www.medschool.lsuhsc.edu/surgery/meet_the_residents.aspx

WORK LOCATIONS:  
Virtual experiences for clinical and academic teaching sites. Primary rotation sites include West Jefferson Medical Center and University Medical Center New Orleans.

PREREQUISITES:  
Must be a 4th Year Medical Student from an LCME or COCA accredited medical school.

SCHEDULE OF REQUIRED ACTIVITIES

<table>
<thead>
<tr>
<th>WEEK 1: Vascular Principles</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Vascular Access &amp; Closure</strong></td>

COURSE MATERIALS/RESOURCES

REQUIRED:
- Must have access to a computer with video capabilities and internet connection.
- *Vascular and Endovascular Surgery at a Glance*
  Morgan McMonagle, Matthew Stephenson
- Simulation materials (recommended)
  - Castro needle driver
  - Suture
  - Practice graft material

SUGGESTED:
We suggest using ancillary vascular surgery textbooks and resources to supplement each student’s learning. Utilize these texts for in-depth research projects or presentations.

Although a variety of texts are appropriate, we recommend the following:

Reference Textbooks
- Rutherford’s Vascular Surgery and Endovascular Therapy, 9th edition
- Current Therapy in Vascular and Endovascular Surgery, 5th edition
- Haimovici’s Vascular Surgery, 6th edition

Surgical Atlases
- Anatomic Exposures in Vascular Surgery, 3rd edition (Wind & Valentine)
- Atlas of Vascular Surgery and Endovascular Therapy, 1st edition (Chaikof & Cambria)

Handbooks
- GORE Vascular/Endovascular Surgery Combat Manual (free PDF available online – email GORE for hard copy)
- Handbook of Patient Care in Vascular Diseases, 6th edition

Online Resources
- Audible Bleeding: Vascular surgery focused podcast with associated video lectures, exam reviews, and “how I do it” videos
- Houston Methodist DeBakey CV Education: YouTube channel hosted by the Department of Cardiovascular Surgery at Houston Methodist Hospital boasting a large library of video resources including operative videos, recorded conferences, grand round lectures, and expert panels

COURSE LEARNING OBJECTIVES

Learning will be accomplished via:
1. Clinical and operative learning via virtual rounding and clinical/surgical case discussions with residents and faculty.
3. Dedicated 1:1 Faculty and Resident mentorship
4. Weekly reading assignment discussion with residents
5. Detailed case presentation
The specialty of vascular surgery encompasses the treatment of disease in the clinical and surgical setting, with lifelong patient-physician relationships. Consequently, the scope of this practice is broad and includes not only surgical/endovascular management but also medical treatment modalities.

In addition to basic surgical concepts, medical students will learn how to provide care for patients with complex arterial and venous pathologies:
- Atherosclerotic/embolic arterial disease
- Aneurysmal disease
- Aortic dissection
- Vascular trauma
- Venous/Lymphatic disease
- Vascular malformations
- Hemodialysis access
- Vascular medicine

Students will understand how principles of vascular surgery are founded in the systemic component of vascular disease, and integrated medical management. They will learn the role of the vascular surgeon as consultant to ancillary medical and surgical services.

The curriculum will be tailored to the educational goals of the student. Educational objectives will be reviewed on an individual basis prior to the rotation.

**CORE COMPETENCIES**

**Evaluation of patients for vascular disease**
- Thorough, complete medical history (including cardiovascular and peripheral vascular history)
- Assessment of cardiovascular risk factors
- Focused understanding of arterial and venous anatomy
- Physical examination (pulse examination, neurologic exam)
- Non-invasive assessment of peripheral vascular system (ankle-brachial indices, doppler exam)
- Introduction to advanced vascular testing (Duplex ultrasound, CT, MR, catheter-based angiography)

**Preoperative and postoperative assessment**
- Develop case presentation skills
- Identify common complications of vascular surgical procedures
- Wound care and management

**Basic surgical technique**
- Sterile technique
- Patient preparation for surgery (room setup, patient positioning, draping, etc.)
- Suturing
- Knot tying
- Introductory knowledge of common surgical instruments
- Introductory knowledge of endovascular platforms (sheaths, catheters, wires, balloons, stents)

**ASSESSMENT/EVALUATION OF STUDENT PERFORMANCE**

The Course Director/Residents/Faculty will meet with you each daily to request feedback and to discuss your educational and training goals and objectives. At the end of the week, any deficiencies will be addressed, and opportunities to meet your educational goals and objectives will be scheduled.
Medical students must complete the course and faculty evaluations of this and all School of Medicine courses in order to receive a grade. The identity of individual students will not be shared with the course instructors upon review of evaluations.

The Course Director collates evaluations and proposed scores (Non-pass/Pass/Honors\(^*\)) from faculty and residents and assigns the final grade. Criteria for Honors or Extraordinary level of performance include knowledge at a Level 1 Vascular Surgery resident, self-starting, self-motivation, and impeccable work discipline.

\(^*\)-some Schools do not accept grade “Honors”

It is expected that students who excel with a fundamental knowledge in vascular surgery, and exhibit dedication for vascular patient care will be a candidate for a letter of recommendation.

**STUDENT EVALUATION**

Anonymous pre-rotation and post-rotation surveys will be employed for feedback and improvement in the learning experience. Students will receive an email with a link to the evaluation survey. We appreciate your input and ask that you complete the evaluation.
