G. Kyle Fulton, MD, attended medical school at University of Arkansas for Medical Sciences, before completing a pediatrics residency with LSU and Children's Hospital of New Orleans. After residency he practiced running the nursery at one of the largest birthing centers in Louisiana for several years. In 2020 he completed training as a Craniofacial Pediatrician at Seattle Children's Hospital and the University of Washington with the only formal Craniofacial Pediatrics fellowship in the world. He and the rest of the Craniofacial Center are excited to expand our comprehensive care for our patients.

**Objectives:** At the conclusion of this activity, participants should be able to:

1. Explain the importance of multi-disciplinary care for children with cleft lip and palate.
2. Outline an overall timeline of care for children with cleft lip and palate.
3. Discuss potential interventions by the pediatrician throughout childhood.

**Intended audience:** This activity is specifically directed towards the pediatrician, but it is open to all other interested physicians, residents, medical students, and allied health professionals.

**CME statement:** Children's Hospital is accredited by the Louisiana State Medical Society to provide continuing medical education for physicians. Children's Hospital designates this live activity for a maximum of *1.0 AMA PRA Category 1 Credit*<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**CEU statement:** Children's Hospital is approved as a provider of nursing continuing professional development by Louisiana State Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

**Wednesday, February 2, 2022 12:00pm - Endocrine Society SBIR Grants Webinar** (does not have to be Endocrinology related) -If you plan to apply for an SBIR grant this year, join the Entrepreneurship Special Interest Group (SIG) on Wednesday, February 2 at 1:00 PM EST for a webinar that will introduce you to the SBIR grants process. Meytal Waiss-Rosh, MSc, MBA, the Director of Business Development at FreeMind Consultants will share her own experiences in grants applications in a conversation moderated by Jim Zanghi, PhD, the CEO and Founder of Elixera, Inc. The event will:

- familiarize entrepreneurs with the SBIR/STTR program;
- discuss different funding opportunities, and different funding agencies; and
- provide practical grant writing tips.

Find more information about the webinar [here](#).

**Thursday, February 17, 2022 from 2-5p EST** The CTR N3C sites are hosting an investigator engagement event for those interested in attending. This event will demonstrate IDeA-CTR members to the National COVID Cohort Collaborative (N3C). The N3C Data Enclave is a secure platform through which harmonized clinical data provided by our contributing members are stored. The Enclave includes demographic and clinical characteristics of patients who have been tested for or diagnosed with COVID-19, and further information about the strategies and outcomes of treatments for those suspected or confirmed to have the virus. This event will feature a keynote presentation by Dr. Chris Chute, Co-PI for N3C, and presentations by IDeA-CTR N3C leadership and investigators, including Drs. Sally Hodder and Clifford Rosen. [Click here for more information.](#)

**Tuesday, March 1, 2022** - The USC/UCLA CBPH invites interested investigators to submit proposals by March 1. These pilots are to support projects for twelve months beginning on July 1<sup>st</sup>, 2022 and end on June 30<sup>th</sup>, 2023. [See full announcement here.](#) Research should be relevant to health outcomes that are important in the aging process but is not limited to research on only older samples. We have a particular interest in promoting the development of novel biomarker measures for use in populations. Current focus of CBPH pilots is novel biomarkers for health outcomes at older ages, epigenetics, transcriptomics, telomeres, proteomics, markers of immune function and senescence and MRI markers. Pilots are expected to lead to subsequent NIH funding. More information on activities of the CBPH at <http://gero.usc.edu/CBPH/research.html>.
