

PEDI 419 – Primary Acting Internship – WARDS/HEME-ONC

o The student functions as an intern in the evaluation and management of hospitalized pediatric patients under the direct supervision of house officers and faculty. Emphasis is given to improving clinical judgment, medical decision making, and systems-based practice through increased student responsibility on the team. During the Acting Internship, the student will complete 2 weeks on the pediatric hospitalist service and 2 weeks on the hematology-oncology service, with potential for a night float experience based on availability. Evaluations will be based on day-to-day observations by faculty and house officers while the student is performing assigned duties. The experience is offered at Children’s Hospital of New Orleans.
